Background and scope of the research

Background of the research

The Contact Center Outsourcing (CCO) market has evolved to include key strategic elements beyond the traditional contact centers such as CX consulting and digital CX services. Despite the ongoing consolidation witnessed in the market with multiple mergers and acquisitions, this expanded scope of services driven by the digital CX needs of enterprises is likely to increase the market attractiveness for not only the incumbent players, but also for new providers with differentiated digital CX capabilities.

The traditional CCO market is expected to grow at a CAGR of ~4-5% to reach US\$91-93 billion in 2020. As the adoption of digital CX (projected to grow a CAGR of 20-25%) increases, potential disruptors could emerge in the market challenging the traditional CCO model and differentiators built primarily through labor arbitrage and scale.

In this study, we investigate the state of the CCO market. We focus on:

Evolving buyer expectations in delivering next-generation CX

Market size and growth

Adoption trends by geographies, industries, and processes

Emerging solution trends in CXM services

Future outlook for 2018-2019

Overview and abbreviated summary of key messages (page 1 of 2)

The global CCO market grew at ~4% in 2017 to reach US\$81-83 billion, driven by the growing interest among new buyers for outsourcing and the emerging growth avenues for service providers around consulting and digital CX solutions. Digital CX, which is currently at 4-6% of the overall CCO market, is expected to grow at a CAGR of 20-25% over the next five years. The buyer expectations have evolved as they increasingly look to partner with service providers, who embrace customer-centricity and proactively suggest innovative solutions to transform their CX operations. This has resulted in increased significance of the CXM solution trends such as CX consulting, omnichannel platforms, and digital capabilities such as automation and analytics solutions. This report provides an overview of the CCO market, evolving buyer expectations, market size & adoption trends, key solution characteristics, and outlook for 2018-2019.

Some of the findings in this report, among others, are:

Evolving buyer expectations in CXM

- The evolving CX needs of enterprises include gaining in-depth customer understanding, sourcing the relevant technology capabilities to deliver personalized CX, and building highly-qualified talent pool for managing CX
- The digital outsourcing drivers for enterprises such as access to better technology, analytics, and multi-channel / omnichannel solutions are increasingly becoming more important than the traditional outsourcing drivers

CCO market overview

- The global CCO market grew at ~4% in 2017 to reach US\$81-83 billion, driven by the growing interest among new buyers for outsourcing and emerging growth avenues for service providers around consulting and digital CX
- The global CCO market has reached an inflection point, where two business models have clearly emerged – scale-first CCO and digital-first CCO

Overview and abbreviated summary of key messages (page 2 of 2)

CCO market adoption trends

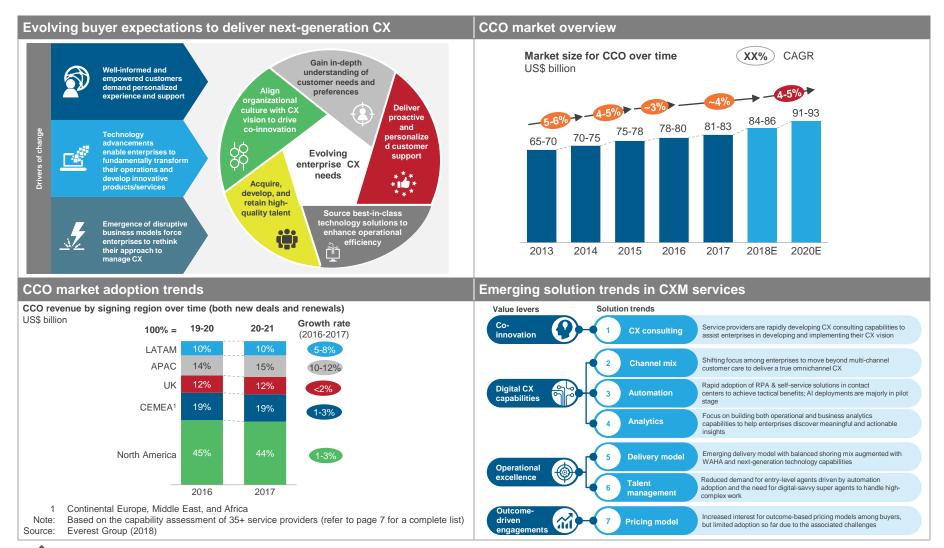

- North America experienced flat growth in 2017, while Asia Pacific was the fastest growing geography with around 10-12% growth rate in 2017. Latin America grew at an aboveaverage market growth rate (5-8%)
- BFSI, retail, and travel experienced high growth in 2017. The growth in BFSI was mainly
 due to the shifting focus of enterprises to digitally transform their CX operations and deliver
 other value-added services

Emerging solution trends in CXM services

- Consultative engagement models are increasingly preferred by buyers, as they look up to their service providers to support their ongoing efforts for digital transformation
- Chat and social media have grown at a higher rate in the past two years due to the increased demand for conversational commerce through chat channel and improving customer retention through social media
- RPA and rule-based chatbots have been majorly adopted across many use cases in contact centers so far, and effective implementation of these solutions can reduce Average Handle Time (AHT), call waiting times, and increase customer satisfaction
- Operational analytics solutions such as desktop analytics and agent performance analytics are widely adopted in contact centers. Adoption of business analytics solutions is expected to increase over the next few years
- The adoption of outcome-based pricing models has been quite slow, despite growing interest among enterprises, due to challenges in defining, monitoring, and managing measurable outcomes

This study offers four distinct chapters providing a deep dive into key aspects of CCO market; below are four charts to illustrate the depth of the report

Research calendar – Customer Experience Management (CXM) Services
