## Background and scope for the research

Post the COVID-19 pandemic, creating a seamless, frictionless, and digital customer-centric insurance experience has become the new standard for insurers. The adoption of technology plays a major role in empowering customers and agents. This includes AI-enabled chatbots that assist in the customer journey, ML algorithms for loss prevention analytics for personalized recommendations, and data & content management to provides agents with a holistic customer view and help in up-selling. The insurers’ competitive landscape with the entry of digital-native companies and InsurTechs, and their own legacy technology stack are posing major threats to the existing enterprises. Insurance companies are thus leveraging DXPs for content management, customer experience, and agent enablement to stay competitive. DXPs possess capabilities for targeted campaigning, hyper personalization, self-service portals, collaboration tools, and a customer/agent 360-degree view to improve the retention rates and response times.

In this research, we present an assessment and detailed profiles of 11 DXP providers featured on the Digital Experience Platforms in Insurance Industry Products PEAK Matrix®. Each platform provider profile provides a comprehensive picture of its key strengths and areas of improvement across parameters that include, but are not limited to focus, platform capabilities, and case studies. The assessment is based on Everest Group’s annual RFI process for calendar year 2021, interactions with leading DXP providers, client reference checks, and an ongoing analysis of the DXP market.

Everest Group's remarks on DXP providers

Illustrative example

Market impact				Vision & capability					
Market adoption	Portfolio mix	Value delivered	Overall	Vision and strategy	Technology capability	Flexibility and ease of deployment	Engagement and commercial model	Support	Overall
High	High	High	High	High	Low	Low	Low	Low	Low

Strengths

- DXP provider 1, has a well-established ecosystem of technology partners that equip the provider's offerings with digital capabilities ranging from niche technology specialists, SI partners, and InsurTechs
- It offers a well-rounded and robust CMS module that helps create seamless cross-channel experiences and support for content governance

Areas of improvement

- DXP provider 1 has limited capabilities to support agents, and it needs to focus on improving insurance-specific capabilities for the existing experience platform
- Its current client base is more skewed toward P&C insurance carriers, which can be a deterrent to serving a broader set of insurance enterprises
