

Global Locations Annual Report 2018: Service Delivery Portfolios in a Disrupted World

Locations Insider™

Annual Report – June 2018: Complimentary Abstract / Table of Contents

Our research offerings for global services

▶ Market Vista™

Global services tracking across functions, sourcing models, locations, and service providers – industry tracking reports also available

▶ Application Services

▶ BPS | Banking & Financial Services

▶ BPS | Healthcare & Life Sciences

▶ BPS | Insurance

▶ Catalyst™

▶ Cloud & Infrastructure

▶ Customer Experience Management Services

▶ Digital Services

▶ Engineering Services

▶ Finance & Accounting

▶ Human Resources

▶ ITS | Banking & Financial Services

▶ ITS | Healthcare & Life Sciences

▶ ITS | Insurance

▶ IT Services Forecaster™

▶ Locations Insider™

▶ PricePoint™

▶ Procurement

▶ Recruitment & Talent Acquisition

▶ Service Optimization Technologies

Membership information

- This report is included in the following research program(s)
 - **Locations Insider™**
- **If you want to learn whether your organization has a membership agreement or request information on pricing and membership options, please contact us at info@everestgrp.com, unitedkingdom@everestgrp.com, or india@everestgrp.com**

More about membership

In addition to a suite of published research, a membership may include

- Price book
- Pinnacle Accelerators
- Data cuts
- Analyst access
- Virtual Roundtables
- Workshops

Custom research capabilities

- Benchmarking | Pricing, delivery model, skill portfolio
- Peer analysis | Scope, sourcing models, locations
- Locations | Cost, skills, sustainability, portfolio – plus a tracking tool
- Tracking services | Service providers, locations, risk
- Other | Market intelligence, service provider capabilities, technologies, contract assessment

Contents

- 1 Introduction and overview
- 2 Summary of key messages
- 3 Key trends shaping the landscape
- 4 Risk Watch
- 5 PEAK Matrix™
- 6 Center setup activity database
- 7 Appendix

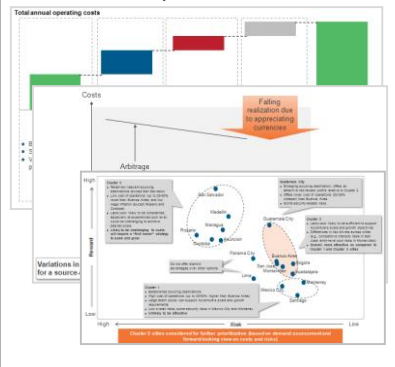

Our research methodology is based on four pillars of strength to produce actionable and insightful research for the industry

- Market thought leadership
- Actionable and insightful research
- Based on on-the-ground perspectives

1

Robust definitions and frameworks

(Talent pool scalability and sustainability assessments, cost arbitrage sustainability, and risk assessment frameworks)

2

Primary sources of information

(Ongoing interactions with buyers, GICs/captives/SSCs, service providers, investment promotion agencies, recruiters, etc.)

3

Diverse set of market touchpoints

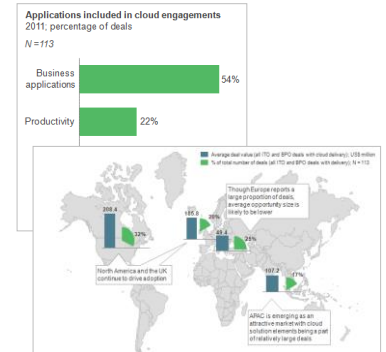

(Ongoing interactions across key stakeholders, inputs from a mix of perspectives and interests, supports both data analysis and thought leadership)

4

Fact-based research

(Data-driven analysis with expert perspectives, year-round tracking of location and service provider activity, and country briefings)

- Proprietary tracking and databases on operating costs, labor pool, market activity, and risks
- Year-round tracking of 200+ locations around the world
- Coverage across all offshore, nearshore, and onshore locations across regions (APAC, Europe, North America, LATAM, and Africa)
- Over 100 global projects on supporting clients on location decisions
- Executive-level relationships with buyers, service providers, technology providers, and industry associations

Overview and abbreviated summary of key messages (page 1 of 2)

The Global Locations Annual Report 2018 is a unique and comprehensive guide to understanding the nuances of the global services locations landscape and interpreting locations-related developments and trends to frame locations strategy. This report has three tenets – Key Trends Shaping the Landscape, Risk Watch and Locations PEAK Matrix™. It presents insights about the size and growth of the global services market, update of locations activity, changes in risk profiles of locations, and an analysis of the relative maturity, arbitrage, and potential of locations for multiple functions.

Some of the findings in this report, among others, are:

Key trends shaping the landscape

Growth of global services market

- The global services market witnessed lower growth in 2016-17 as compared to the previous year due to multiple factors including macroeconomic slowdown, increased trade protectionism, and uncertainties in legal and regulatory landscape. This was witnessed across revenue, headcount, and new center setup activity growth

Evolving location portfolios

- Increased evidence of players rethinking their location strategies given rapid rate of product-service evolution, changing customer expectations, and declining margins across industries. While Asia Pacific continues to be the destination of choice for center setups, service delivery is increasingly being characterized by greater adoption of Nearshore Europe

Shifting sourcing models and services mix

- There have been shifts even in sourcing models with enterprises adopting insourcing to a greater extent as compared to outsourcing. Additionally, given increasing digitalization, companies are focusing more on building skills in and delivery of IT-related services, particularly through the GIC model

The rise of reshoring

- There is evidence of sustained increased in reshoring given increasing need for front-office and back-office integration, strong digital-ready workforce, and increased regulatory oversight – these are more characteristic of onshore locations

Risk Watch

At an overall level, evidence of significant variations in operating and business environment risk across locations driven by multiple factors such as quality of IT/BP infrastructure, macroeconomic stability, safety and security, regulatory environment, and ease of doing business

- Across Asia Pacific, most locations offer favourable operating environment; however, there are some concerns around natural hazards in Indonesia and uncertain tax environment in the Philippines
- Within Americas, there some concerns around political stability, macroeconomic stability, and safety and security across locations such as Argentina, Brazil, Nicaragua, and Guatemala; other locations, such as Chile, Costa Rica, and Uruguay, offer relatively lower business risks
- In Europe, Middle East and Africa, most locations offer favourable business environment backed by strong infrastructure, strong macroeconomic conditions, and relatively stable political systems

PEAK Matrix™

The relative attractiveness of locations is driven by maturity, potential and cost-arbitrage over source markets. While 2017 witnessed some changes in the relative positioning of the locations, going forward, we expect significant changes as players look to optimize their portfolios by expanding into nearshore markets

- Across Asia Pacific, India and the Philippines maintained their “leader” positions for specific English delivery functions; there is evidence of increasing preference towards leveraging tier-2/3 locations.
- Within Americas, Argentina and Costa Rica remained “leaders” for bilingual BPS delivery and are also known for IT and contact center delivery
- In Europe, Middle East and Africa, Poland continued to remain “leader” for European languages BPS followed by Ireland

This study includes three distinct reports providing a deep dive into key aspects of global services market; below are key charts to illustrate the depth of the report (page 1 of 2)

Global services revenue and growth

Global services revenue and growth
2014-2018(E); US\$ billion

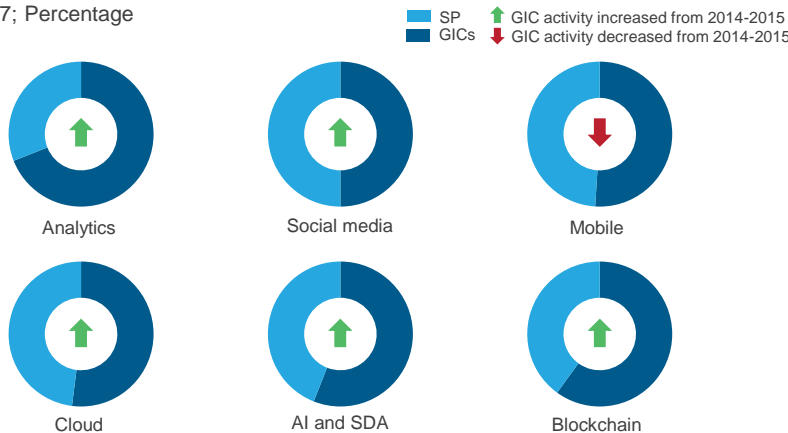

New center-setup activity by regions

Global services market | Share of delivery regions by headcount
2014-2017; Number of FTEs (in millions)

Breakup of digital center setup activity

Breakup of digital center set-up activity by functions and sourcing models
2016-2017; Percentage

The rise of reshoring

New onshore delivery centers of top 20 service providers by region
2012-2017; Number of centers

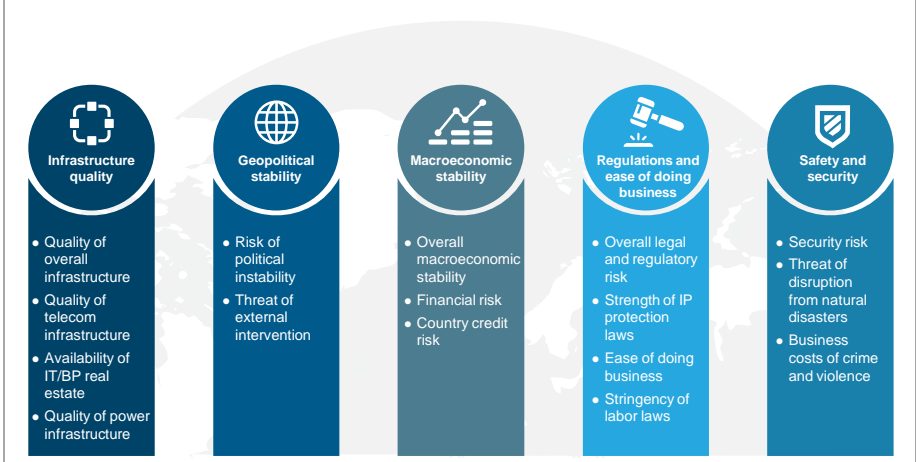

This study includes three distinct reports providing a deep dive into key aspects of global services market; below are key charts to illustrate the depth of the report (page 2 of 2)

Global service delivery maturity of leading delivery locations

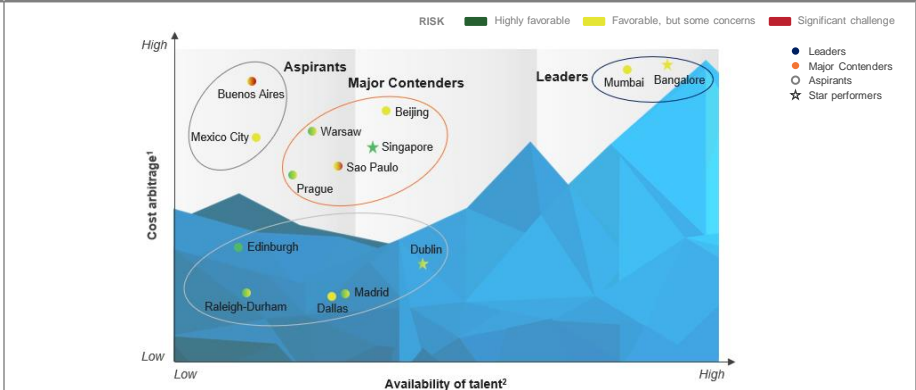

Operating/business risk across leading global delivery locations

Everest Group Locations PEAK Matrix™ for IT-ADM

Everest Group Locations PEAK Matrix™ for Analytics

1 Current and forward-looking financial savings potential offered over source markets
 2 Considers relevant entry-level and experienced talent
 Note1: The assessment has been done only for a representative list of locations
 Note2: We used representative cities to depict typical talent-cost positioning for tier-1 and tier-2 cities for some countries (e.g., Bangalore as a tier-1 city in India and Kochi as a tier-2 city in India); there could be other cities in the country that also offer comparable propositions to these cities
 Source: Inputs from market players, recruitment firms, and investment agencies

Additional Locations Insider™ research references

The following documents are recommended for additional insight on the topic covered in this report. The recommended documents either provide additional details on the topic or complementary content that may be of interest

- 1. Poland Tier-2/3 Cities: Complementing Tier-1 Cities or Carving a Niche for Digital Services?** ([EGR-2017-2-R-2451](#)); 2017. The cities in Poland play a critical role in the delivery of global services for both global and European players. As the global services industry matures, there is a gradual shift in the mix of locations being leveraged. With increasing competition, companies are looking to reduce costs and access additional talent pool for services delivery. The last few years have witnessed a surge in interest for global services delivery from tier-2 and tier-3 cities in Poland. Further, the “digital winds of change” have forced players to rethink their sourcing strategy to build and sustain digital capabilities. Unlike other geographies (e.g., India and the Philippines), where tier-1 cities account for more than 70% of all digital delivery centers, Poland has witnessed significant activity for digital services in tier-2/3 cities as well
- 2. Brexit, GDPR, and Digital Winds of Change: Disruption or Transformation of Service Delivery to the United Kingdom and Ireland?** ([EGR-2017-2-R-2388](#)); 2017: Offshore, nearshore, and onshore locations play a critical role in delivery to the United Kingdom and Ireland. Over the last few years, demand from UK- and Ireland-based enterprises has increased significantly across IT, voice BPS, non-voice BPS, and digital services. This report provides a detailed assessment of locations (globally) supporting demand from the UK and Ireland region
- 3. Global Locations Annual Report 2017: Signs of Structure in a Disordered World** ([EGR-2017-2-R-2234](#)); 2017. The global services locations landscape continued to witness stable growth in 2016 in terms of revenue; however, the growth rate was slower than the previous year owing to macroeconomic slowdown, political instabilities, and volatility in equity and investment markets. This period continued to witness a shift from traditional locations; particularly, the share of India in terms of both center set-up activity and headcount reduced in 2016 as compared to some other locations in Nearshore Europe and Asia, which witnessed increase in their respective shares. This year also saw increase in delivery of IT and engineering/R&D services as compared to business process services. The Global Locations Annual Report 2017 is a unique and comprehensive guide to understanding the nuances of the locations landscape and interpreting locations-related developments and trends to frame locations strategy. It presents insights into the size and growth of the global services market, update of center set-up activity, changes in risk profiles of locations, and an analysis of the maturity, arbitrage, and potential of locations (MAP Matrix™)
