

Insurer of the Future: Insurance ITO Annual Report 2018

Banking, Financial Services & Insurance (BFSI) - Information Technology Outsourcing (ITO)
Annual Report – December 2017: Complimentary Abstract / Table of Contents

Our research offerings for global services

▶ Market Vista™

Global services tracking across functions, sourcing models, locations, and service providers – industry tracking reports also available

▶ Application Services

▶ BPS | Banking Financial Services

▶ BPS | Healthcare & Life Sciences

▶ BPS | Insurance

▶ Catalyst™

▶ Cloud & Infrastructure

▶ Contact Center

▶ Digital Services

▶ Engineering Services

▶ Finance & Accounting

▶ Human Resources

▶ ITS | BFSI*

▶ ITS | Healthcare & Life Sciences

▶ IT Services Forecaster™

▶ Locations Insider™

▶ PricePoint™

▶ Procurement

▶ Recruitment & Talent Acquisition

▶ Service Optimization Technologies

▶ Transaction Intelligence

Custom research capabilities

- Benchmarking | Pricing, delivery model, skill portfolio
- Peer analysis | Scope, sourcing models, locations
- Locations | Cost, skills, sustainability, portfolio – plus a tracking tool
- Tracking services | Service providers, locations, risk
- Other | Market intelligence, service provider capabilities, technologies, contract assessment

Subscription information

- This report is included in the following subscription(s)
 - **BFSI ITO**
- In addition to published research, a subscription may include analyst inquiry, data cuts, and other services
- **If you want to learn whether your organization has a subscription agreement or request information on pricing and subscription options, please contact us**

Introduction and Overview	5
Background and scope of the research	7
Section I: The Insurer of the Future	11
• Summary	12
• Drivers of change	14
• Impact of the change drivers on insurers	15
• Word on the street	18
• Insurer of the future	19
• Technology building blocks for the “Insurer of the Future”	21
• Implications for buyers	43
• Implications for service providers	44
Section II: Insurance AO deal analysis	45
• Summary	47
• Size and growth	48
• Trends and characteristics of insurance AO transactions	50
• Adoption trends – LoBs, geography, subfunctions, and digital themes	53
• Renewals	63
Section III: Appendix	64
• Glossary of terms	65
• BFSI ITO research calendar	66
• References	67

Background and scope of the research

Rise of the sharing economy, digital disruption, emergence of non-traditional players, and InsurTechs are creating pressures across the insurance value chain. To stay relevant and competitive in the changing paradigm, insurers are rethinking their business ethos and go-to-market strategy.

The future insurer aims to prevent loss rather than provide protection from loss. To address these challenges and develop new business models, insurance firms are investing in technology solutions and adopting disruptive business models to improve customer experience, contain costs, and increase profitability.

As insurers look to invest in digital technologies such as artificial intelligence (AI), analytics, blockchain, and IoT among others, IT service providers are collaborating with insurers to build and evaluate proof-of-concepts (POCs), develop customized solution offerings and test use cases in innovation labs and CoEs. IT service providers are also creating an ecosystem of InsurTechs and platform providers, among others, to enable insurers to build a plug-and-play model.

The future is that of an invisible insurer, as insurers are bundling insurance with products & services and becoming invisible to the end-customer.

In this research, we analyze the current trends and the future outlook for large, multi-year application outsourcing relationships for the global insurance sector. We focus on:

Market trends and activity for large AO relationships in insurance

Future of insurance and technology building blocks

Implications for buyers and service providers

The research also captures key movements in volume/value of insurance AO transactions, evolving trends, market dynamics, and emerging priorities of buyers in the last 12 months.

Scope of this report

INDUSTRY

Insurance (Life, annuities, and pension (L&P); property and casualty (P&C); and reinsurance)

SERVICES

Large (TCV1>US\$25 million), multi-year (more than three years), and annuity-based application outsourcing

GEOGRAPHY

Global

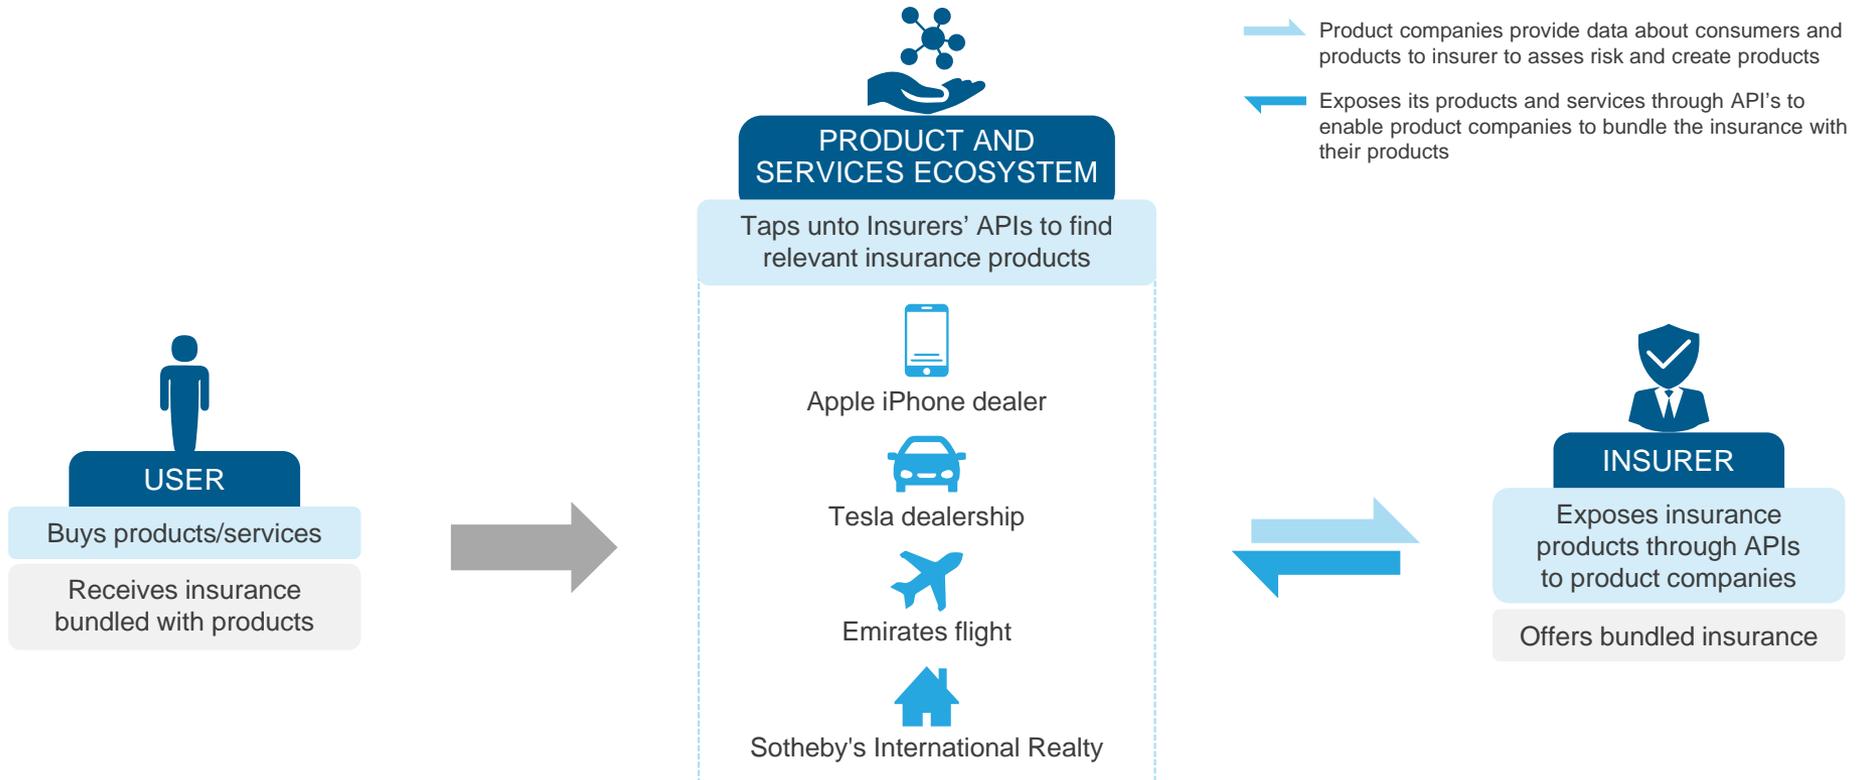

SOURCING MODEL

Third-party AO transactions; excludes shared services or Global In-house Centers (GICs)

Insurer of the future

Insurers need to enable easy ecosystem interfacing and partnerships for smart packaging of products

As insurers look to offer bundled insurance, they will need to simplify their services to be easily ingested by product providers (financial or non-financial).

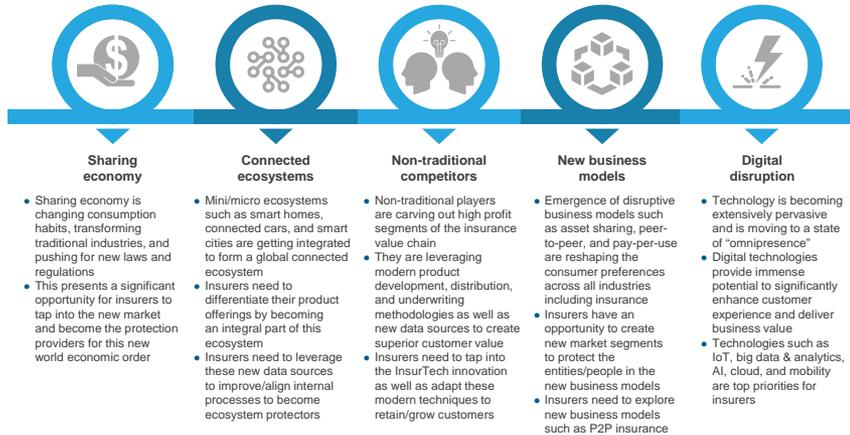

To plug-and-play to product ecosystems, insurers will need to tap into open source and open standards, develop new demand-based products, offer customizable insurance options, and build application programming interface (API) to expose their products in an open and secure manner.

As the insurer will bundle its (insurance product) protection with products and services, the future insurer is the **"Invisible Insurer"**.

This study offers two distinct chapters providing a deep dive into key aspects of insurance IT services market; below are four charts to illustrate the depth of the report

Drivers of change

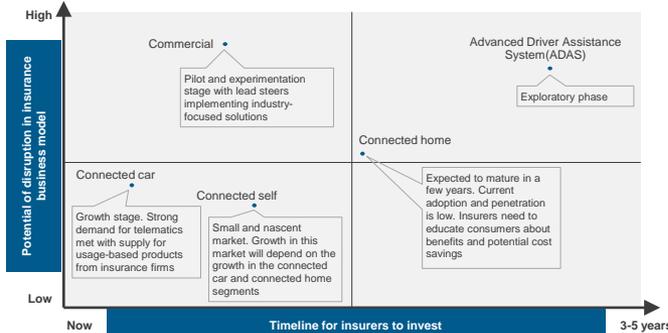

Impact of the change drivers on insurers

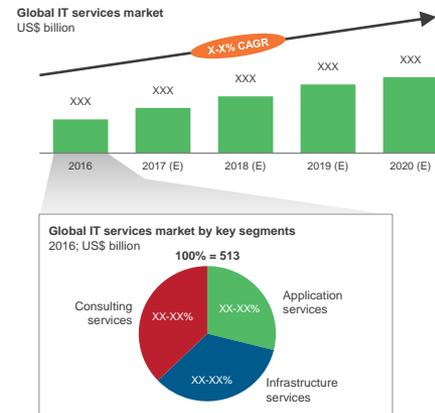

Technology building blocks | Connected ecosystems

Insurers are looking to tap into the opportunity provided by different connected ecosystems. Each ecosystem is at a different stage of maturity. Thus, insurers, while developing their go-to-market (GTM) strategy and planning investments, need to understand the market maturity and future potential to develop products and services.

Global IT services market | Key segments

EVEREST GROUP ESTIMATES

- Application services**
- Demand for application services is fueled significantly by demand for application development and testing services
 - Despite this, the bulk of application services continue to be driven by application maintenance and support. However, with Agile and DevOps taking center stage, the scope of services is changing
 - Increasing automation across the application lifecycle continues to impede the scope of pure labor-based engagements
- Infrastructure services**
- While cloud adoption continues to drive demand for infrastructure services, security is rapidly becoming table stakes
 - Moreover, automation across IT operations in a DevOps model continues to boost demand
- Consulting services**
- Business imperatives to improve agility and operational efficiency are leading enterprises to adopt systems integration and consulting services
 - A highly complex IT portfolio further necessitates consulting services

Additional research references

The following documents are recommended for additional insight into the topic covered in this report. The recommended documents either provide additional details on the topic or complementary content that may be of interest.

1. **IT Outsourcing in Global Banking – Service Provider Landscape with PEAK Matrix™ Assessment 2017 and Profiles Compendium** ([EGR-2017-11-R-2232](#)); 2017. This report provides an overview of the Application Outsourcing (AO) market for the banking industry through an in-depth analysis of large-sized AO contracts (i.e., contracts over US\$25 million in TCV and over three years in duration). The report analyzes key trends in market size & growth, demand drivers, adoption & scope trends, emerging priorities of buyers, key investment themes, and future outlook for 2016 with regards to such large banking AO deals
2. **Digital Force Multiplier – A Cloud Adoption Story in Banking and Financial Services: Public Cloud First** ([EGR-2017-11-R-2315](#)); 2017. This report analyses top 15 BFS enterprises across four geographies (Australia, Europe, the United Kingdom, and the United States) to understand the role of cloud technology in enhancing the digital experience. These BFS enterprises have been mapped on Everest Group's proprietary assessment framework. The research also includes a detailed study and profiles of leading cloud service providers and their offerings catering to the needs of BFS enterprises.
3. **FinTechs in Payments – Top 40 Trailblazers** ([EGR-2017-11-R-2172](#)); 2017. In this report, we analyze current state of FinTech adoption, drivers of growth, investment trends, key areas of disruption within the payments value chain, and 40 leading FinTechs that stood out from a list of around 125
