# Table of contents

---

- **Product overview**
- **Illustrative contents**

# The increasing complexity of the outsourcing market has amplified the risk exposure for companies

## Factors driving increased risk

**Vendor and model proliferation** Multiple service providers and business models

**Large span of functions** Typically combination of many IT, BPO and some KPO services

**Increasing scope** Significant proportion of operations now in low cost locations

**Global delivery chain** Services often delivered from multiple locations with diverse risk footprint

**Dynamic economies** Most delivery locations are emerging economies going through rapid change

## Examples of risks

### Regulatory risk

Ensuring compliance with regulatory guidelines in source and destination countries across service providers

### Business case risk

Managing wage inflation without affecting quality of service

### Performance risk

Managing quality of service delivery, attrition, knowledge retention

### Data security and

intellectual property risk  
Implementing measures to safeguard data and intellectual property

### Concentration risk

### Business continuity risk

### Currency risk

....

**Most large companies have capabilities in global risk management. However, the level and type of risk exposure that is emerging from the globalization of services is unprecedented**

# Sourcing leaders are being asked to manage risks associated with global sourcing and support the delivery of transformational results

## Key decisions that Sourcing managers need to support

- Comparison with peers
- Location risk management
