# Background and scope of the research

---

## Background of the research

- Enterprises are now challenged not by the lack of technology, but by its overwhelming abundance. To stay ahead of the competition, enterprises are increasingly adopting approaches to integrate technology themes across their value chain. This convergence of technology themes is driving increased investments from service providers, who are ramping up their portfolio to offer end-to-end services to buyers. Though the nature and extent of adoption of digital services varies, the intent of most enterprises to “change” the business, in addition to “run”, is calling for action from service providers to aid enterprises in their digital journey
- In this research, we present the assessment and detailed profiles of 18 IT service providers featured on the digital services PEAK Matrix. Each service provider profile provides a comprehensive picture of their service suite, scale of operations, and domain investments
- The assessment is based on Everest Group’s annual RFI process for the calendar year 2015, interaction with leading digital service providers (including product development service providers), client reference checks, and analysis of the digital services market

## Scope of this report

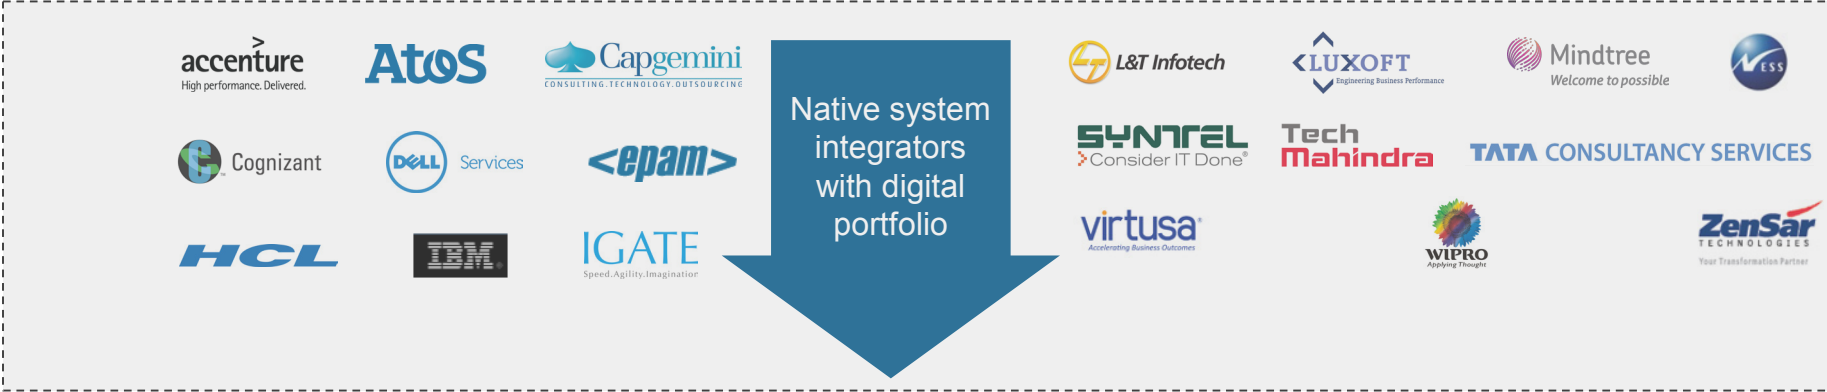

- **Services:** Digital services
- **Geography:** Global
- **Service providers:** Leading 18 digital service providers

This report includes the profiles of the following 18 service providers:

- **Digital services PEAK Matrix Leaders:** Accenture, Cognizant, IBM, and TCS
- **Digital services PEAK Matrix Major Contenders:** Atos, Capgemini + IGATE, Dell Services, HCL Technologies, L&T Infotech, Mindtree, Syntel, Tech Mahindra, Virtusa, and Wipro
- **Digital services PEAK Matrix Aspirants:** EPAM, Luxoft, Ness SES, and Zensar

# Though the lines differentiating these digital service providers are blurring and often overlapping, the scope of this research includes the system integrators with a digital portfolio

Scope of research

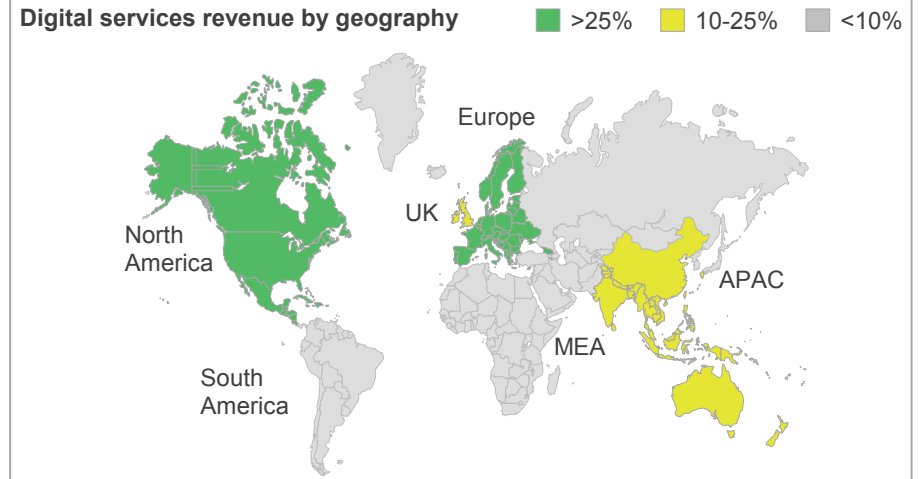

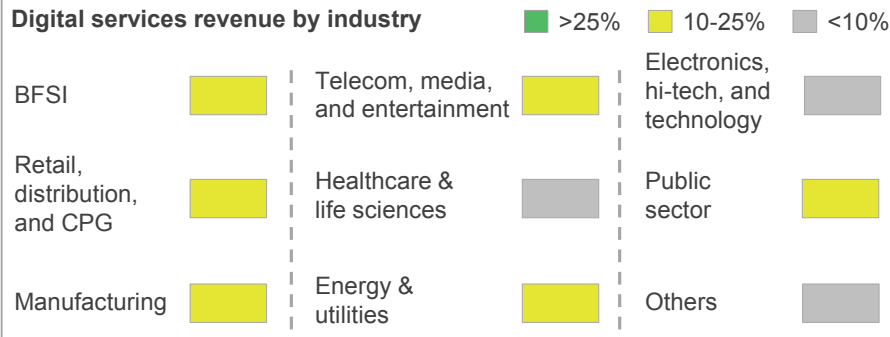

# XYZ | Digital services profile (page 1 of 3)

## Digital services overview

### Headline assessment

Strong portfolio of offerings across the digital stack, boosted by acquisition of capabilities in design and customer experience segments, positions XYZ as a Leader in this space. Legacy of providing consulting services, complemented by global delivery footprint and strong buyer perception, helps to win larger transformation deals. It should invest in developing branded offerings in areas such as IoT, AI, and cognitive computing, where it continues to lag behind its main competitors.

**Overview of digital services practice:** Digital strategy & business architecture, customer experience, social media & collaboration, analytics, connected devices, cloud, digital marketing, content management, mobility, e-commerce, etc.

<sup>1</sup> Includes Artificial Intelligence (AI), robotics, automation, Internet of Things (IoT), etc.

Note: As most providers have requested non-disclosure of revenue, it has not been included on the service provider profile

# Additional research recommendations

The following documents are recommended for additional insight into the topic covered in this research. These documents either provide additional details on the topic, or complementary content which may be of interest

- 1. North America Digital Adoption Survey – How Pervasive is Your Digital Strategy?:** ([EGR-2015-4-R-1551](#)); 2015. This report focuses on digital adoption in North America and covers:
  - Digital technology adoption (adoption trends, adoption maturity, adoption priorities, and digital spend)
  - Digital imperatives and market segments (investment characteristics and adoption maturity of four distinct market segments viz. Digital Pervasives, Digital Sellers, Digital Efficientes, and Digital Enablers)
  - Outlook for digital investments (across market segments)
  - Vendor perceptions (most relevant vendors for enterprises' digital strategy)
  - Implications for enterprises
  - Implications for service providers
- 2. Enterprise Digital Adoption: High Returns, Will They Sustain?:** ([EGR-2015-4-R-1504](#)); 2015. As enterprises move beyond prototypes and pilot adoption of digital technologies, valid questions around Return on Investments (RoI) will crop up. Though currently digital initiatives are flush with money and have the backing of senior leadership, they need to demonstrate meaningful RoI. This Everest Group research analyzes the leading digital technologies expected to bring the maximum RoI and suggests measures that the enterprises need to adopt to consistently get returns on these digital initiatives
