Overview and abbreviated summary of key messages

This report provides a comprehensive assessment of the healthcare start-ups landscape. It delves deep into factors such as the ways in which the start-ups disrupt the status quo of the current healthcare business models, degree of technological involvement, and the value it brings to stakeholders across the healthcare continuum. The report also profiles leading (hot) start-ups across the five principal investment categories.

Some of the findings in this report, among others are:

Healthcare: A market craving for innovation

- Currently healthcare suffers from systemic issues of cost, access & quality, with room for innovation
- A combination of renewed government policies, innovative care delivery, and care financing models are expected to transform the industry
- There are various elements of the healthcare value chain that need innovation and a fresh approach to problem solving, thereby proving an opportunity for start-ups

Hot healthcare start-ups: Key players driving disruption

- Even though the overall funding climate has begun to show signs of correction, healthcare is witnessing a resurgence in investment activity
- Innovative care delivery and financing models form key categories in the healthcare transformation landscape. From a long list of over 200, we selected start-ups that were able to raise sufficient funds from the market, and aligned them to five categories
- Players in the start-ups space were analysed across three themes – technology disruption, business disruption, and market buzz

Investment focus: Assessment of key investment categories

- **Care financing:** Start-ups provide technology-powered innovative business models, enable provider-payer collaboration, and deliver supreme customer experience
- **Care management:** Start-ups are reinforcing customer centricity and generating meaningful business insights for improving care quality
- **EHR:** Focus in on enabling interoperability via API-based models, developing unified view of patients, and focusing on cost optimization
- **Practice management:** Focus on improving clinical decision support, supporting seamless network management, and optimizing front-desk operations
- **Telehealth:** Attention on improving customer experience, monitoring patients & enhancing access

Overall methodology

Everest Group deployed a multi-tiered approach to identify leading healthcare start-ups and leading investment areas

Additional Healthcare & Life Sciences research references

The following documents are recommended for additional insight into the topic covered in this report. The recommended documents either provide additional details on the topic or complementary content that may be of interest

1. **Pre-competitive Collaboration Platforms in the Biopharmaceutical Industry** ([EGR-2016-12-V-1766](#)); May 2016. Pre-competitive collaboration is a novel research model in biopharmaceuticals, with the intention of accelerating collaboration and productivity, ultimately leading to more new medicines and therapies for patients. The research model exists in multiple forms including public-private partnerships. It aims to aggregate research prowess in the biopharmaceutical industry, establish an open culture of shared innovation & expertise and ultimately incentivize collaboration. In light of recent heightened activity in this space, this viewpoint explores the theme along R&D crisis in biopharma, clinical and R&D trends, existing collaborative platforms/alliances, successful implementation and use-case, challenges to adoption, and best practices
2. **Healthcare & Life Sciences Digital Adoption Trends – Digital Adoption Driven by Consumerization of Healthcare** ([EGR-2016-4-R-1748](#)); April 2016. This report focuses on digital adoption by Healthcare and Life Sciences (HLS) enterprises across North America and Europe. It establishes a definitional framework for digital adoption and assesses the extent of digital technology adoption amongst HLS enterprises. The research identifies drivers for adoption, adoption maturity of digital technologies by HLS enterprises, optimism levels based on existing investments, and key priorities for the future. The report also identifies key implications for HLS enterprises and service providers.
3. **State of the Healthcare and Life Sciences (HLS) Market; March 2016** ([EGR-2016-12-V-1719](#)); 2016. In the midst of an evolving healthcare and life sciences (HLS) landscape (both from the demand and supply side) as well as a services landscape in transition, this report looks at identifying the opportunities, quantifying the market size, comprehending the competitive dynamics, and analyzing the key themes for 2016
