Background, scope, and methodology for enterprise platform IT services in BFS PEAK Matrix™ assessment 2019

- Global banking and capital markets firms are modernizing their IT systems by adopting enterprise platforms to create superior customer experience, reduce latency, improve efficiency and Straight Through Processing (STP), manage regulations, and adopt next generation technologies
- These firms face significant challenges in adopting platform-based technologies such as burden of legacy, talent shortages, and resistance to change. IT service providers are helping enterprises build a structured approach to modernization by investing in proprietary solutions and accelerators, consulting frameworks, talent development, and thought leadership and design thinking. Service providers are increasing the scope and scale of partnerships with third-party providers to accelerate enterprise platform adoption
- In this research, we studied the vision and capability of 20 IT service providers for enterprise platform IT services specific to the Banking and Financial Services (BFS) industry. We also evaluated the market impact generated by each IT service provider

Strengths

- Service provider 1, has a robust delivery presence in Asia Pacific with multiple delivery centers in India, Australia, the Philippines, and China, enabling it to service client requirements efficiently
- It has a good number of multi-country as well as single-country clients across the world

Areas of improvement

- Service provider 1 should increase offerings of value-added services such as employer branding, talent communities and workforce planning
- It should try to expand into larger multi-country deals and also scout for engagements in other Asia Pacific markets to strengthen its presence in the region
