

Clinical and Care Management (CCM): Is the Value-based Elixir Really Working?

Healthcare & Life Sciences Business Process Services (HLS BPS)

State of the Market Report – January 2020: Complimentary Abstract / Table of Contents

Our research offerings for global services

▶ Market Vista™ Global services tracking across functions, sourcing models, locations, and service providers – industry tracking reports also available	
▶ Application Services	▶ Human Resources
▶ BPS Banking & Financial Services	▶ ITS Banking & Financial Services
▶ BPS Healthcare & Life Sciences	▶ ITS Healthcare
▶ BPS Insurance	▶ ITS Insurance
▶ Catalyst™	▶ IT Services Executive Insights™
▶ Cloud & Infrastructure	▶ ITS Life Sciences
▶ Customer Experience Management Services	▶ Locations Insider™
▶ Data & Analytics	▶ PricePoint™
▶ Digital Services	▶ Procurement
▶ Engineering Services	▶ Recruitment & Talent Acquisition
▶ Enterprise Platform Services	▶ Service Optimization Technologies
▶ Finance & Accounting	

Membership information

- This report is included in the following research program(s)
 - [Healthcare & Life Sciences Business Process Services \(HLS BPS\)](#)
- If you want to learn whether your organization has a membership agreement or request information on pricing and membership options, please contact us at info@everestgrp.com

More about membership

In addition to a suite of published research, a membership may include

- Accelerators™
- Analyst access
- Data cuts
- Pinnacle Model® reports
- PriceBook
- Virtual Roundtables
- Workshops

Custom research capabilities

- Benchmarking | Pricing, delivery model, skill portfolio
- Peer analysis | Scope, sourcing models, locations
- Locations | Cost, skills, sustainability, portfolio – plus a tracking tool
- Tracking services | Service providers, locations, risk
- Other | Market intelligence, service provider capabilities, technologies, contract assessment

Table of contents

Topic	Page no.
Executive summary	4
Background and methodology	5
Section I: Demand drivers for clinical and care management	7
• High and rising healthcare spend	9
• Shift to value-based care	11
• Collaboration between payers and providers	13
• High ROI on risk adjustment	16
Section II: Investment tenets and sourcing considerations	17
• Investment tenets	18
• Sourcing consideration: talent	20
• Sourcing consideration: access to global locations	22
• Sourcing consideration: domain knowledge	23
• Sourcing consideration: ecosystem of players	26
• Sourcing consideration: sourcing spread	27
• Sourcing consideration: technology	28
Section III: Service provider landscape	30
Appendix	34
• Glossary of key terms	35
• Research calendar	37
• References	38

Our research methodology is based on four pillars of strength to produce actionable and insightful research for the industry

- Market thought leadership
- Actionable and insightful research
- Syndicated and custom research deliverables

1 Robust definitions and frameworks
CCM value chain pyramid, Total Value Equation (TVE), PEAK Matrix™, and market maturity

2 Primary sources of information
Annual contractual and operational RFIs, service provider briefings and buyer interviews, web-based surveys

3 Diverse set of market touchpoints
Ongoing interactions across key stakeholders, input from a mix of perspectives and interests, supports both data analysis and thought leadership

4 Fact-based research
Data-driven analysis with expert perspectives, trend-analysis across market adoption, contracting, and service providers

- Year-round tracking of 16 CCM BPS service providers
- Large repository of existing research in CCM BPS
- Dedicated team for CCM BPS research, spread over two continents
- Over 20 years' experience of advising clients on CCM BPS-related decisions
- Executive-level relationships with buyers, service providers, technology providers, and industry associations

Introduction and scope

Healthcare enterprises are facing rising costs, increasing consumerism, and regulatory push toward value-based care. As a result, these enterprises are looking beyond the administrative processes of claims and network management, to reduce the cost of healthcare and provide better care. Additionally, the recent growth in care-focused collaboration models, such as Accountable Care Organizations (ACOs) and alternative payment models (reimbursements linked to value), is making the enterprises shift their focus towards care management.

However, despite the increased focus on care management, clinical and care market is unstructured and lacks standardization when compared with other healthcare processes such as claims, network and RCM. This, coupled with other challenges such as talent shortage and limited technology deployment, is pushing enterprises to seek third-party help.

In order to effectively tackle challenges associated with Clinical and Care Management (CCM), enterprises are looking for third-party support. In the absence of a structured and established market, enterprises find it difficult to meet their sourcing needs from one single vendor. Different categories of vendors are, hence, emerging; each with its unique value proposition.

This report looks at the drivers behind high CCM demand and some of the key sourcing considerations for CCM enterprises. It also examines the vendor landscape and identifies key categories of vendors operating in the CCM space.

Overview and abbreviated summary of key messages

Some of the findings in this report, among others, are:

Demand drivers for CCM

- High and rising healthcare spend – Around 85% of the national health expenditure amounting to almost US\$3 trillion is directly related to care management
- Shift to Value-Based Care (VBC) – prevalence of value-based models is increasing with rising adoption of VBC
- Collaboration between payers and providers – payer-provider partnerships and collaborations models such as Accountable Care Organizations (ACOs) are growing
- High ROI on risk adjustment – the potential for higher payments is driving payer investments in risk adjustment

Key sourcing considerations for enterprises

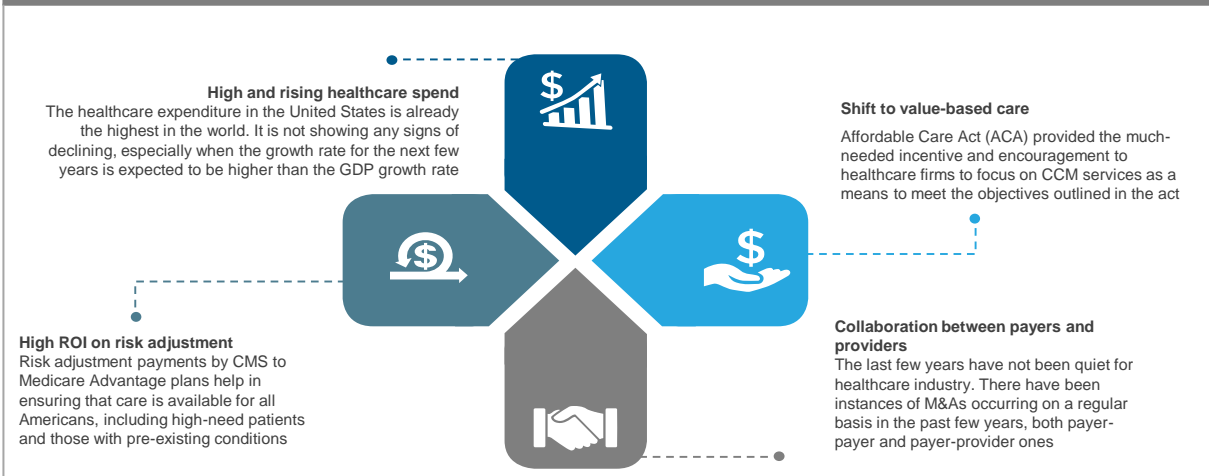

- Talent – enterprises are facing a critical shortage of nursing talent
- Access to global shoring locations – they are looking globally to cull this shortage
- Domain knowledge – they require a domain rich and certified workforce
- Ecosystem of players – they are unable to procure end-to-end services from a single vendor type
- Sourcing spread – their focus on front office processes such as care coordination is increasing
- Technology – they are looking to leverage technology to improve the quality of their care programs and make them more effective

Four key categories of CCM vendors

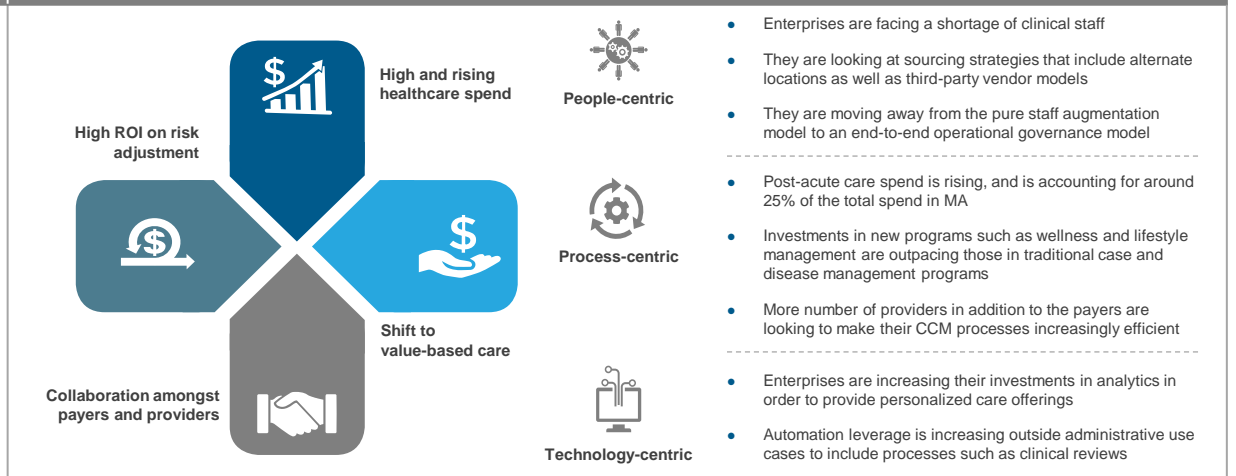

- Start-ups – small-scale innovative companies
- Technology-heavy players – product-centric companies
- Players providing solutions – combining services with productized offerings
- BPO-heavy players – BPO services-centric companies

This study offers four distinct chapters providing a deep dive into key aspects of clinical and care management market; below are four charts to illustrate the depth of the report

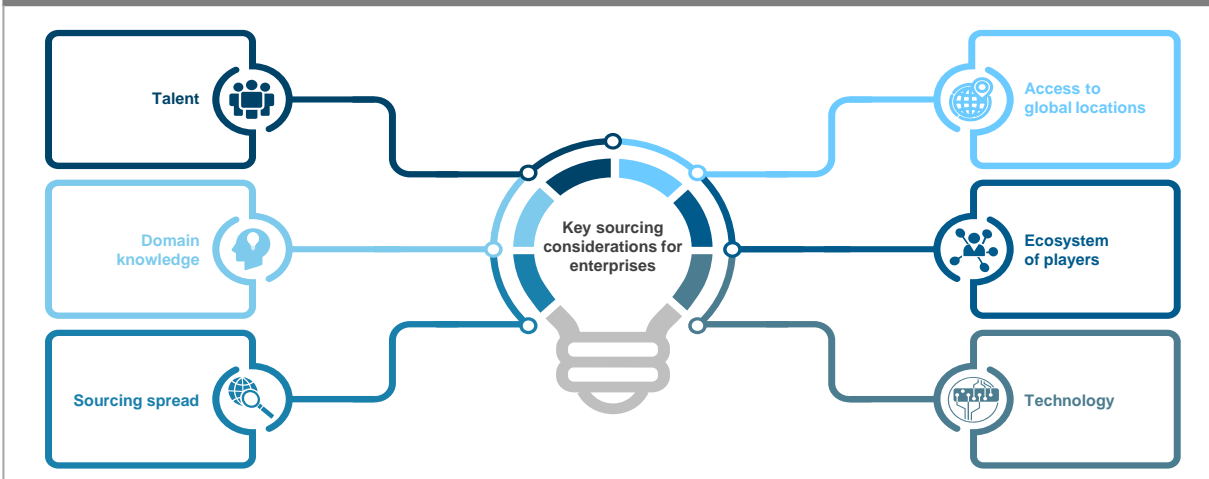

Demand drivers for CCM

Key investment tenets for enterprises to fulfill the CCM demand

Key sourcing considerations across the three investment levers

Four key categories of vendors in CCM space

	Start-ups	Technology-heavy players	Solution providers	BPO-heavy players
Focus (product/service)	Small-scale innovative companies	Product-centric companies	Combining services with productized offerings	BPO services-centric companies
Delivery network	Onshore	Onshore	Onshore	Offshore
Technology adoption	Low	Medium	High	High
Value proposition	Innovation through state-of-the-art technology offerings	At scale technology deployment	Marrying technological capabilities with operational superiority to solve business problems	Providing access to rich domain expertise and skilled bench strength

The following documents are recommended for additional insights into the topic covered in this report. The recommended documents either provide additional details or complementary content that may be of interest

- 1. Clinical and Care Management (CCM) BPS Services PEAK Matrix™ Assessment 2019** ([EGR-2019-20-R-3342](#)); While clinical and care management as a segment has existed for a while now, its importance has increased exponentially post ACA. With the US already being the highest spender in the world on healthcare, ensuring care to reduce readmissions and denials of members is the need of the hour. Also, with ACA shifting the focus from volume-based care to value-based care, the healthcare stakeholders are taking proactive measures to ensure quality care at lower cost for members. This shift is supported by the seepage of consumerism in healthcare, motivating the customers or members to be more involved in their care lifecycle. All this is putting pressure on the payers as well as providers to make investments in clinical and care services and at the same time reduce their costs. With the stakeholders struggling to find the right talent, domain, and technology expertise in house, they are looking for the outsourcing route to help them in their journey
- 2. Healthcare Payer Business Process Services PEAK Matrix™ Assessment 2019** ([EGR-2019-20-R-3141](#)); 2019. With multiple M&As and partnerships being announced, healthcare payers have had a busy last couple of years. Quest for consolidation across the value chain has led payers to merge with PBMs, acquire providers, and invest in technology consortia. Additionally, entry of technology firms, such as Amazon, Apple, and Microsoft, and the rise of new-age digital health insurers further complicates the market scenario for traditional health insurers. All these, when coupled with ongoing perennial challenges related to transition to value-based care, regulations, rise of consumerism, provider consolidation, and increasing medical costs, continue to push payers to look for ways and means to not only survive in this space but also thrive. With this slew of changes, the healthcare in the United States is at an inflection point, with everything from member engagement to administrative management to care management being transformed. For payers, the path ahead lies in transforming the way they, typically, work by imbibing technology
- 3. Makings of a Successful Sourcing Relationship – Deal Trends in Healthcare Payer BPS Market** ([EGR-2019-20-R-3119](#)); 2019. Healthcare payers have always been sluggish in making sweeping technology changes and this year is no different. However, the digital solutions have provided payers the perfect combination of investments and the associated ROIs. This report discusses some of the digital adoption trends by payers and their leverage of third-party service providers in doing so. In addition to leveraging digital assets, payers are also looking for support in areas beyond the traditionally-outsourced claims-associated processes. From creating meaningful member touchpoints to driving higher quality of care, several initiatives have been taken up by all classes of healthcare payers in the US. This report provides initial adoption trends around some of these services as well as matches payer types to areas of interests
