More about membership

In addition to a suite of published research, a membership may include

- Accelerators™
- Analyst access
- Data cuts
- Pinnacle Model® reports
- PriceBook
- Virtual Roundtables
- Workshops

Custom research capabilities

- Benchmarking | Pricing, delivery model, skill portfolio
- Peer analysis | Scope, sourcing models, locations
- Locations | Cost, skills, sustainability, portfolio – plus a tracking tool
- Tracking services | Service providers, locations, risk
- Other | Market intelligence, service provider capabilities, technologies, contract assessment

Membership information

- This report is included in the following research program(s)
 - [Service Optimization Technologies](#)
- If you want to learn whether your organization has a membership agreement or request information on pricing and membership options, please contact us at info@everestgrp.com

Background and scope of research

This report evaluates 250+ start-ups, using artificial intelligence to help enterprises redefine business processes, to arrive at the top 30 trailblazers

- AI is transforming lives and businesses everywhere. From manufacturing to finance to healthcare to procurement, there is hardly any industry vertical or function left untouched by AI
- AI technologies have been gaining maturity over the last decade. Adoption of AI-based solutions by enterprises has been increasing; and AI now plays an important role in helping enterprises to improve the efficiency and effectiveness of their business processes, enhance customer and employee experience, and even transform their entire business model
- Many emerging start-ups offer AI-based solutions to help enterprises achieve these outcomes across different business processes. These start-ups leverage AI technologies such as Machine Learning (ML), computer vision, Natural Language Processing (NLP), and deep learning in their solutions
- In this research, we evaluated more than 250 start-ups to arrive at a list of 30 top start-ups (also called “trailblazers”¹) that are helping enterprises redefine different business processes across 10 different segments (five industry-specific and five horizontal process areas) through an assessment using various parameters around business maturity, market success, solution capability, and investor confidence. The corresponding profiles of the trailblazers are also part of this report

Scope of this report:

Geography
Global

Companies
All major start-ups² offering AI-based solutions to redefine enterprise business processes

Segments³
Start-ups offering solutions across ten segments covering major horizontal and industry-specific process areas

1 For the final list of top 30 start-ups – trailblazers – refer to page 19

2 Only start-ups founded after 2010 that have not been acquired, are not unicorn, and have not gone public before August 2020 are considered. Start-ups offering Intelligent Document Processing or Intelligent Virtual Agent solutions are not considered as they are extensively covered in our flagship SOT reports

3 The ten segments of start-ups considered for this study are given on page 7 of this report

We considered over 250 start-ups that are using AI in business processes for the analysis, and after a thorough assessment, identified the trailblazers

250+

Start-ups focused on enhancing different business processes

More than 250 start-ups were identified. These are start-ups (refer to pages 81-82 in the Appendix) that offer AI-based solutions for business processes across 10 different industry verticals and horizontal functions

100

High potential start-ups

Based on investor confidence, market performance, and the technological expertise of these start-ups, 100 high potential start-ups were identified

30

Trailblazers

A subsequent comparative analysis and benchmarking of the capabilities of the high potential start-ups has led to identification of the trailblazers

Dimensions used for identification of the trailblazers

- Capability of the solutions offered including the extent of AI usage and use cases addressed
- The completeness of solution (in terms of integrations and complementary features)
- Key executive profiles
- The partnership ecosystem (with technology vendors as well as with service providers)
- Market adoption
- Investor confidence and profile

We evaluated start-ups across 10 different segments where AI based solutions are being offered for enterprise business processes

Industry-specific processes

Banking & capital markets

Healthcare & pharma

Insurance

Manufacturing

Retail & e-commerce

Horizontal processes

Finance & accounting

HR & talent acquisition

Procurement

Sales & marketing

Supply chain management

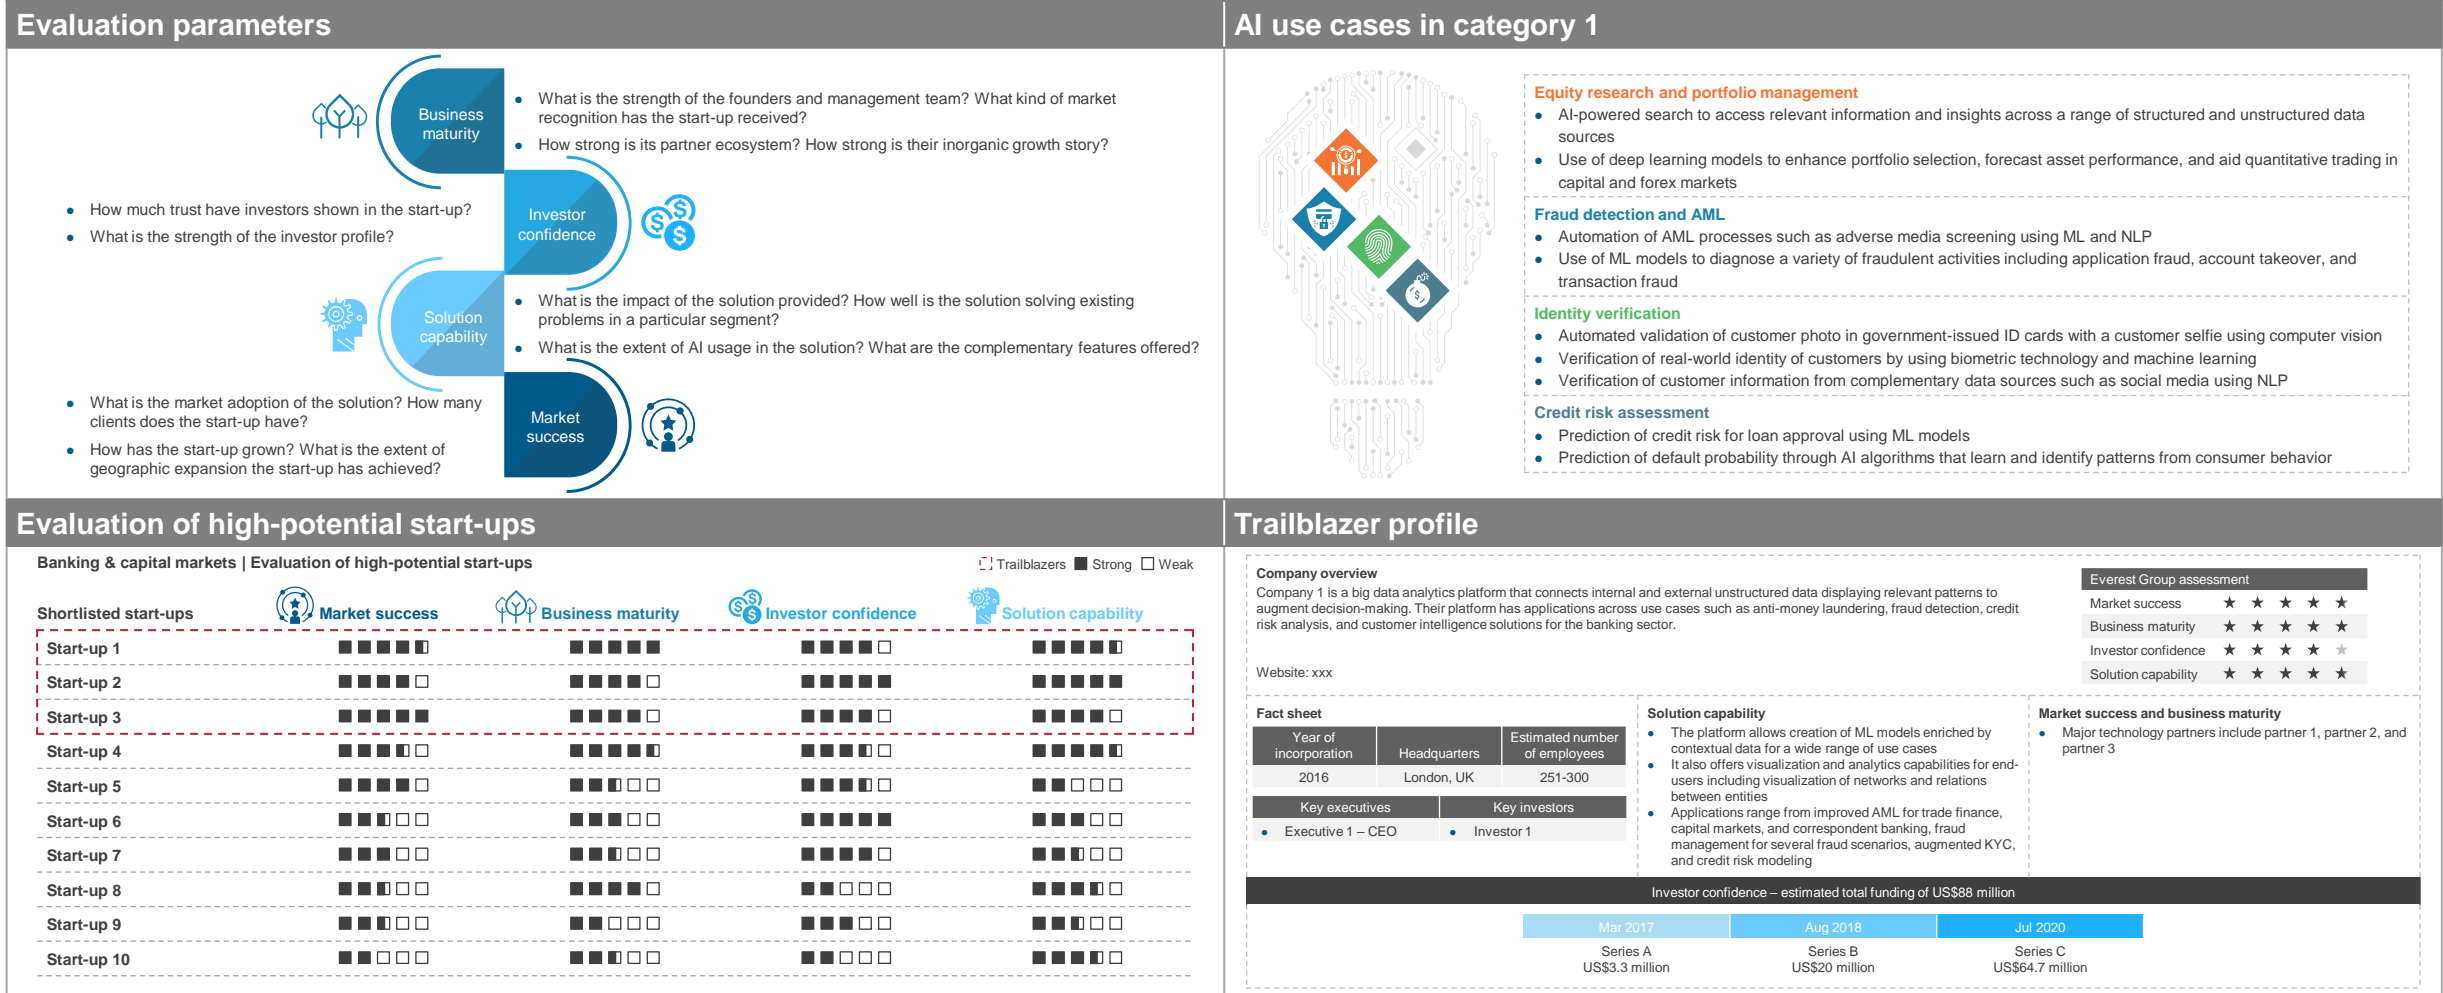

Everest Group analyzed over 250 start-ups across different segments, which are redefining business processes (page 1 of 2)
