## Background of the research

The healthcare IT services space has historically been dominated by global service providers – including the likes of horizontal players such as Accenture, Cognizant, and TCS as well as healthcare-specific giants such as Optum. However, in the past few years, we have witnessed the healthcare IT services supply ecosystem evolving, with a lot of small/mid-sized service providers coming into play and gaining mindshare with clients. These service providers are establishing themselves as specialists in the healthcare IT services domain and gaining strong foothold in the market. A few of them have started challenging the front runners directly, while a few others are creating niche for themselves and operating in specific pockets. In a nutshell, these players are leveraging their healthcare domain expertise, healthcare services specialization, or/and high client intimacy to gain market share.

Everest Group's Healthcare IT Services Specialists – Provider Landscape with Services PEAK Matrix® Assessment 2021 looks at the current healthcare IT services specialists' landscape, key offerings, differentiators, challenges, and outlook for these players. As a scope of this assessment, we are focusing on service providers IT services providers with the total size not more than US\$1 billion, getting 25% or more of their revenue from healthcare business, and falling under one or more of the three buckets – broader healthcare IT services providers, healthcare platform-specific services providers, and healthcare consulting services providers. These service providers are mapped on the Everest Group PEAK Matrix®, which is a composite index of a range of distinct metrics related to a vendor's capability and market impact. We focus on:

- Market update/trends on growing relevance of healthcare IT services specialists
- The landscape of healthcare IT services specialists
