Background of the research

COVID-19 has shaken up the traditional learning practices among organizations. There is now increased focus on digitization of learning and agile learning strategies among enterprises to prepare the employees for future challenges and disruptions. After an initial setback to growth of the market, enterprises are looking to rope in learning service providers, beyond virtualization of classroom learning, to focus on more end-to-end transformation. Thus, the learning services market is expected to grow at a significant pace as more buyers look to outsource parts of their learning & development activities to providers.

In this research, we present and assess the strengths and weaknesses of providers featured on the Learning Services PEAK Matrix®. The assessment is based on Everest Group's annual RFI process for calendar year 2021, interactions with leading learning services providers, client reference checks, and an ongoing analysis of the learning services market.
