1. Introduction and overview	5
• Research methodology	6
• Background of the research	8
• How to read this document	9
2. Summary of key messages	10
3. Understanding DAPs	14
4. DAP market size and adoption trends	18
• Summary	19
• DAP market size	20
• DAP client success stories	22
• DAP adoption trends by	23
– Geography	23
– Industry	24
– Buyer sizes	25
– Platform type	26
– Application type	27
– Enterprise application	28
5. DAP solution characteristics	29
• Summary	30
• DAP solution characteristics	31
– Talent	32
– Partner ecosystem	33

Contents

– Deployment and hosting model	34
– Commercial model	35
6. Buyer feedback, challenges, and best practices	36
• Summary	37
• DAP selection criteria	38
• Vendor performance	39
• Key strengths and areas of improvement as cited by buyers	40
• Challenges and best practices	41
7. Key investment themes	42
• Summary	43
• Technological investments	44
• Service-related investments	46
8. DAP technology vendor landscape	47
• Summary	48
• Market share of DAP vendors by annual realized license revenue in 2020	49
• Number of DAP clients in 2020	50
• Share of DAP licensed revenue across the top five industry verticals	51
• Share of DAP licensed revenue across different geographies	52
9. Outlook for 2022	53
10. Appendix	55
• Glossary	56
• Research calendars	58

Everest Group’s DAP research is based on multiple sources of proprietary information

Proprietary database of ~20 DAP technology vendors

The database tracks the following elements for each vendor:

- Breadth and depth of the product functionalities
- Analytics, reporting, and dashboards
- Investments and innovations
- Partnerships with service providers and other technology vendors
- Support in terms of product training, maintenance, consulting, and other support services
- Availability and adoption of commercial model(s)
- Portfolio coverage in terms of industry, geography, process areas, and buyer size
- Vendor performance in terms of revenue and clients

Demonstrations and interactions with technology vendors and other industry stakeholders

- Detailed demos and interviews with DAP technology vendors for a comprehensive view of the products
- Interviews with technology vendors’ reference clients
- Executive-level discussions with technology vendors as well as service providers that cover:
 - Current state of the market
 - Expected direction of movement in the industry
 - Opportunities and challenges
 - Technology vendor / service provider vision and roadmap
- Executive-level discussions with industry enablers / specialist system integrators to get the buyer perspective, and to reaffirm the findings from other sources
- On-site as well as conference meetings with enterprise DAP buyers to understand:
 - Vision and objectives
 - Outcomes achieved
 - Buying criteria
 - Future direction
 - Apprehensions and challenges

Proprietary database of RPA and AI capabilities of ~100 leading technology vendors and 50+ BPS providers complements the research

The database tracks the following capability elements for each technology/service provider:

- Clients with automation deployments, scale and scope of deployments, cost savings, and case studies
- Automation client portfolio across buyer sizes, geographies, industries, and BPS segments
- Vision and strategy, top automation solutions, their value propositions, and RPA and AI features
- Technology partnerships and collaborations with academic institutes

Vendors assessed in the PEAK Matrix® analysis¹

1 Assessments for HelpHero and Helpier exclude vendor inputs and are based on Everest Group’s proprietary Transaction Intelligence (TI) database, technology vendor public disclosures, and Everest Group’s interactions with DAP buyers. The source of all content is Everest Group unless otherwise specified.

Confidentiality: Everest Group takes its confidentiality pledge very seriously. Any information we collect that is contract specific will only be presented back to the industry in an aggregated fashion.

Background of the research

In 2020, many companies hopped on to the bandwagon of digital transformation to tackle the pandemic and sustain their operations as COVID-19 set limitations on workforce collaboration in office and business operations in the offline mode. This further reinforced the roles that DAPs have the potential to play. Enterprises realized the need to put additional emphasis on customer and user experience as the concerned stakeholders adapted to the digital way of operating. Additionally, organizations looked for solutions that could help them realize the maximum benefit from these investments through a holistic approach to reduce the time taken for users to adopt the applications.

DAPs provide users guidance in the flow of work that helps enterprises achieve their business goals, such as boosting employee efficiency, reducing support tickets and costs, improving customer satisfaction scores, increasing trial conversion, as well as minimizing customer churn, among others. Vendors are continuously investing in enhancing their DAP capabilities and global outreach to better serve the clients. The technologies used in DAPs are evolving with several additions in offerings such as user behavior analytics without deploying walkthroughs, integrated chatbots, content management and aggregation systems, and enhanced content editing options, to cite a few examples.

In this study, we investigate the state of the DAP technology vendor market. We focus on:

- DAP market size and adoption trends
- DAP solution characteristics
- Buyer feedback, challenges, and best practices
- Key investment themes
- DAP vendor landscape
- Outlook for 2022

Scope of this report:

Geography
Global

Technology vendors
DAPs in the market that are available for independent licensing were considered for this report

Overview and abbreviated summary of key messages

DAPs are designed to ease digital transformation for employees and customers – they drive and simplify end user support throughout the digital adoption lifecycle. This report examines the global Digital Adoption Platform market in detail. It focuses on the changing market dynamics and emerging buyer adoption trends. The study provides detailed information about market overview, buyer objectives, key investment themes, and evolving solution characteristics. The report also looks at the vendor landscape and the market shares and growths.

Some of the findings in this report, among others, are:

Market overview and adoption trends

- The DAP market is expected to experience a steady growth for the next few years, as more enterprises adopt DAP to address multiple pain points
- North America remains the top adopter and has the highest revenue contribution; whereas Continental Europe is on a growth trajectory
- Banking, financial services, and insurance industry continues to capture the highest market share followed by hi-tech and manufacturing
- The majority of enterprises adopting DAP solutions were small- or mid-sized enterprises, while large enterprises had a relatively low contribution
- While the majority of DAP deployments have been for browser-based applications, it is expected to increase for other platforms as well

DAP solution characteristics

- The talent demand for the DAP market has seen an upward growth with sales and marketing leading the split. The market also experienced a more balanced geographical distribution of the FTEs
- DAP vendors are strengthening their service partner ecosystem to expand product outreach and to meet the demand for training and consulting/implementation
- Cloud deployments, especially on public cloud, are expected to gain further momentum due to the inherent benefits such as ease of deployment and cost reduction
- Greater flexibility to scale deployments and low upfront investments are major factors in driving the adoption of commercial models

Buyer feedback, challenges, and best practices

- Pricing as a selection criteria experienced a significant jump due to increased vendor evaluations by enterprises. Functionalities, PoCs, customer support, and ease of implementation are the other top selection criteria
- Buyers continue to be satisfied with the overall performance of DAP vendors as well as most of their offerings. However, there is still a gap in reporting and analytics feature that vendors need to bridge

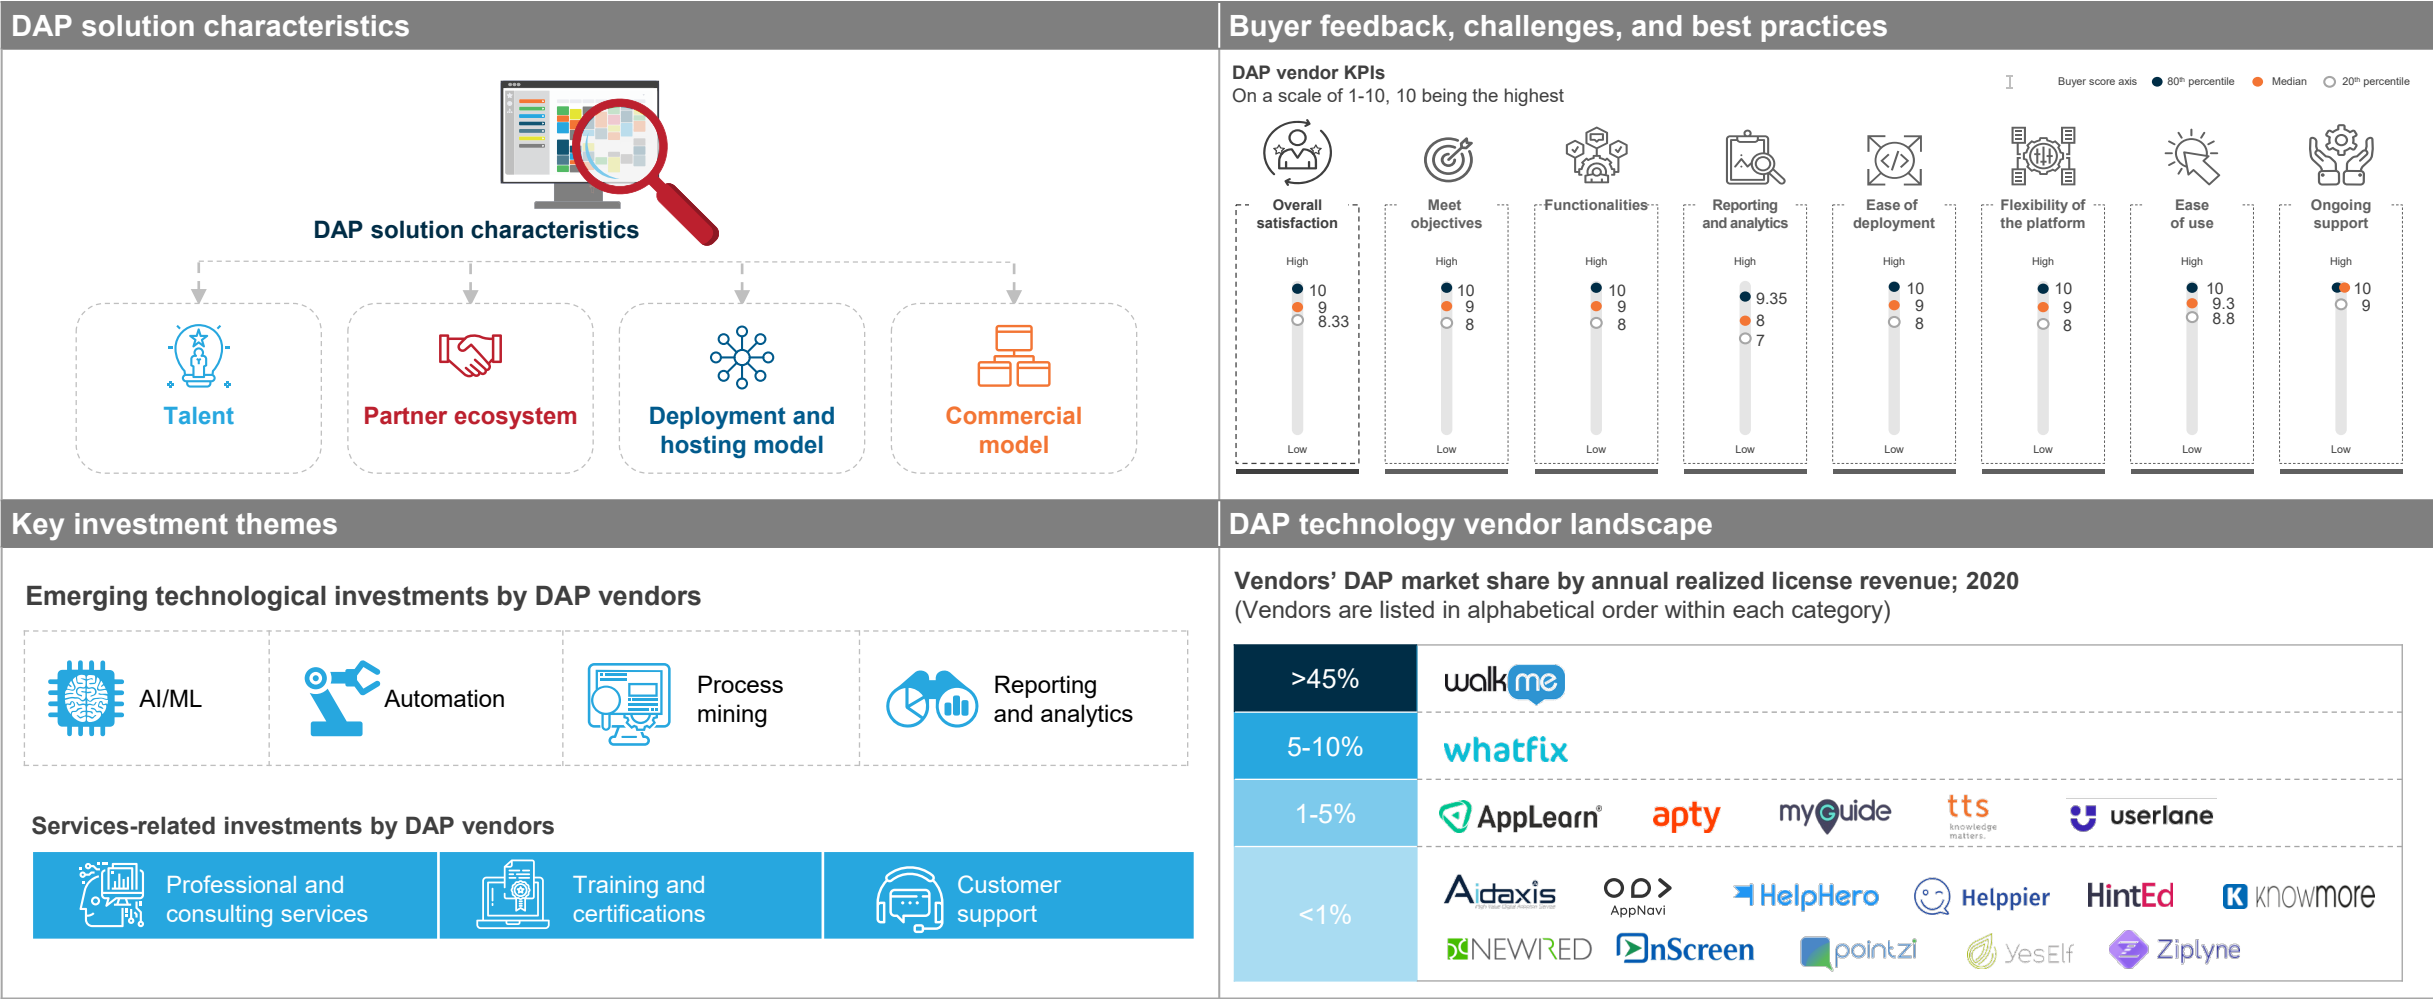

Key investment themes

- As the DAP market matures, the vendors seek out opportunities to enhance their technological capabilities to gain a competitive advantage over their peers
- DAP vendors are making investments to provide better professional and consulting services, more trainings and certifications, and round-the-clock customer support to their clients

DAP technology vendor landscape

- WalkMe had the highest DAP market share in 2020; Whatfix, tts GmbH, MyGuide by EdCast, Userlane, AppLearn, and Apty have reasonable market shares
- WalkMe continues to serve the majority of the DAP clients in the market, followed by Whatfix, tts GmbH, Userlane, MyGuide by EdCast, Apty, and AppLearn

This study offers multiple chapters providing a deep dive into key aspects of the DAP market; below are four charts to illustrate the depth of the report
