

Powering Business Processes with Intelligent Automation – Intelligent Processes Automation (IPA) State of the Market Report 2021

June 2021: Complimentary Abstract / Table of Contents

Our research offerings

This report is included in the following research program(s):

Service Optimization Technologies

- ▶ Application Services
- ▶ Banking & Financial Services BPS
- ▶ Banking & Financial Services ITS
- ▶ Catalyst™
- ▶ Clinical Development Technology
- ▶ Cloud & Infrastructure
- ▶ Conversational AI
- ▶ Contingent Workforce Management
- ▶ Cost Excellence
- ▶ Customer Experience Management Services
- ▶ Cybersecurity
- ▶ Data & Analytics
- ▶ Digital Adoption Platforms (DAP)
- ▶ Digital Services
- ▶ Engineering Services
- ▶ Enterprise Platform Services
- ▶ Finance & Accounting
- ▶ Financial Services Technology (FinTech)
- ▶ Global Business Services
- ▶ Healthcare BPS
- ▶ Healthcare ITS
- ▶ Human Resources
- ▶ Insurance BPS
- ▶ Insurance ITS
- ▶ Insurance Technology (InsurTech)
- ▶ Insurance Third-Party Administration (TPA) Services
- ▶ Intelligent Document Processing (IDP)
- ▶ Interactive Experience (IX) Services
- ▶ IT Services Executive Insights™
- ▶ Life Sciences BPS
- ▶ Life Sciences ITS
- ▶ Locations Insider™
- ▶ Market Vista™
- ▶ Mortgage Operations
- ▶ Multi-country Payroll
- ▶ Network Services & 5G
- ▶ Outsourcing Excellence
- ▶ Pricing-as-a-Service
- ▶ Process Mining
- ▶ Procurement
- ▶ Recruitment Process Outsourcing
- ▶ Rewards & Recognition
- ▶ Service Optimization Technologies
- ▶ Supply Chain Management (SCM) Services
- ▶ Talent Excellence GBS
- ▶ Talent Excellence ITS
- ▶ Workplace Services
- ▶ Work at Home Agent (WAHA) Customer Experience Management (CXM)

1. Introduction and overview	6
• Research methodology	7
• Key information on the report	8
• Background of the research	9
• How to read this document	10
2. Summary of key messages	11
3. IPA market overview	15
• Impact of COVID-19	16
• Evolution of automation	17
• Key components of Intelligent Automation (IA)	18
• IPA market size and growth	19
• COVID-19 related IPA use cases	20
• IPA revenue split by offerings	21
• IPA adoption drivers	22
• Buyer satisfaction	23
• Key strengths and areas of improvement cited by buyers	24
• Benefits derived due to IPA	25
4. IPA adoption trends	26
• Adoption trends by industry	27
• Adoption trends by business process/function	28

Contents

• Adoption trends by geography	29
• Adoption trends by buyer size	30
• Adoption trends by automation type and technology areas	31
• Scalability of automation	32
5. IPA solution characteristics	33
• Talent and sourcing	34
• Technology offerings	37
• Packaged solutions	39
• Commercial models	41
• Deployment	42
• Technology partnerships	43
6. IPA services characteristics	44
• Consulting services	45
• Process mining adoption	46
• Implementation accelerators	47
7. IPA solution provider landscape	49
• Overall market share	50
• Revenue growth	51
• Vendors with largest share in top industry verticals	52
• Vendors with largest share in top business functions	53

Contents

• Vendors with largest share in major geographies	54
• Major investment themes	55
8. Challenges, best practices, and future outlook	56
• Key challenges for adoption and scaling of IPA and associated best practices	57
• Outlook for 2021-22	59
9. Appendix	62
• Glossary	63
• Research calendar	65

Background of the research

Enterprises are facing unprecedented pressure to reduce costs, optimize operations, and increase business resilience, more so due to the ongoing COVID-19 crisis. Multiple digital elements are disrupting the status quo. Both on the demand as well as supply side; digital technologies, automation in particular, are becoming ubiquitous. Enterprises are expecting not only cost reduction, but also next-generation benefits from their relationships; and solution providers have recognized the need to pivot quickly to a digital-powered model to provide those benefits to their clients. One of the most potent digital levers enabling this transformation is Intelligent Process Automation (IPA).

Everest Group defines IPA as Intelligent Automation (IA) in business processes achieved through any combination of automation technologies such as Robotic Process Automation (RPA) and cognitive/AI-based automation. The scope of this report includes:

- IPA solutions: sourcing of IPA technology products along with consulting, implementation, and maintenance services; however, no traditional BPO services
- IPA services only: sourcing of IPA services such as consulting, implementation, and maintenance

This report does not cover IPA technology products that are licensed independently or embedded within broader BPO deals.

In this study, we investigate the state of the IPA market and focus on:

IPA market overview

Adoption trends across areas such as industry, business function, geography, and buyer size

IPA solution characteristics

IPA services characteristics

IPA solution provider landscape

Outlook for 2021-22, along with challenges and best practices

Overview and abbreviated summary of key messages (page 1 of 2)

This research provides IPA buyers and solution providers a detailed view of the current state of the market and analyses it across various dimensions, including market overview and adoption trends, solution characteristics, services characteristics, IPA solution provider landscape, and outlook for 2021-22.

Some of the findings in this report, among others, are:

IPA market overview

- Enterprises across the globe faced various challenges due to COVID-19 and realized the importance of automation for ensuring business resilience, agility, and growth
- The global IPA market surpassed US\$4.5 billion at the end of 2020. Though the pandemic slowed growth in 2020, IPA adoption is expected to experience a significant uptick coming out of the crisis. It is expected to grow at a CAGR of 40-50% over the next two years, driven by the pent-up demand for automation

Adoption trends

- BFSI continues to be the largest adopter of IPA solutions and services, followed by healthcare & pharma, CPG & retail, and telecom
- In 2020, industry-specific processes and F&A experienced the highest adoption, while BFSI and healthcare had the highest adoption within industry-specific processes
- North America is the largest adopter of IPA with 50% of the market share, followed by Continental Europe and the UK

Solution characteristics

- IPA solution providers' attention is split almost equally between RPA and cognitive automation; while implementation talent dominates across the scope of services
- APAC continues to dominate as a source of IPA talent, followed by North America and Continental Europe
- Solution providers are offering solutions across RPA, IDP, conversational AI, etc., while rolling out innovative offerings, such as RPA-as-a-service, to address emerging needs in the IPA market

Overview and abbreviated summary of key messages (page 2 of 2)

Services characteristics

- Solution providers offer a wide range of consulting services in the IPA space that are spread across process, technology, automation strategy, and workforce transformation
- Process mining is becoming an integral tool that solution providers are leveraging to drive successful enterprise automation initiatives

IPA solution provider landscape

- Cognizant, IBM, Infosys, PwC, TCS, and Wipro dominate the market in terms of IPA revenue
- Accelirate, Persistent Systems, and Sopra Steria have experienced the highest YoY revenue growth, indicating strong market demand for IA technology
- Though Cognizant, IBM, and TCS are dominating the IPA market in most of the verticals, including BFSI and telecom, IBM, TCS, and Wipro have dominant market share in most business functions

Future outlook

- Enterprises that are ahead of their peers in digital transformation journey are performing considerably better during the COVID-19 pandemic. This realization has made enterprises accelerate their automation journeys
- Enterprises across verticals are looking to automate at a much faster pace, resulting in new use cases across verticals, especially in BFSI, healthcare, and the public sector
- Enterprises are increasingly seeking cognitive components in their IPA engagements to acquire human-like decision making capability for their business processes
- Solution providers are increasingly developing function- and vertical-specific packaged solutions due to increasing demand from enterprises

This study offers six distinct chapters providing a deep dive into key aspects of the IPA market; below are four charts to illustrate the depth of the report

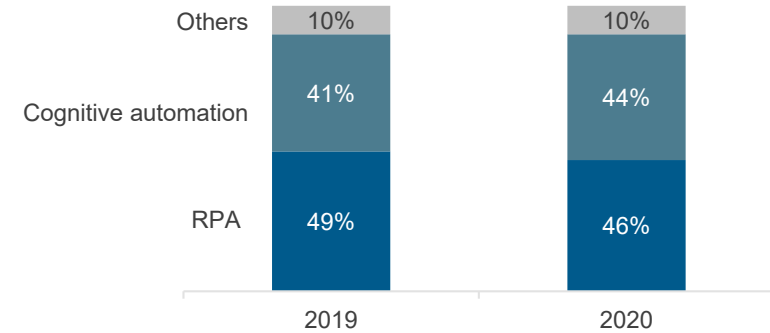

IPA market overview

IPA market size
Revenue in US\$ billion

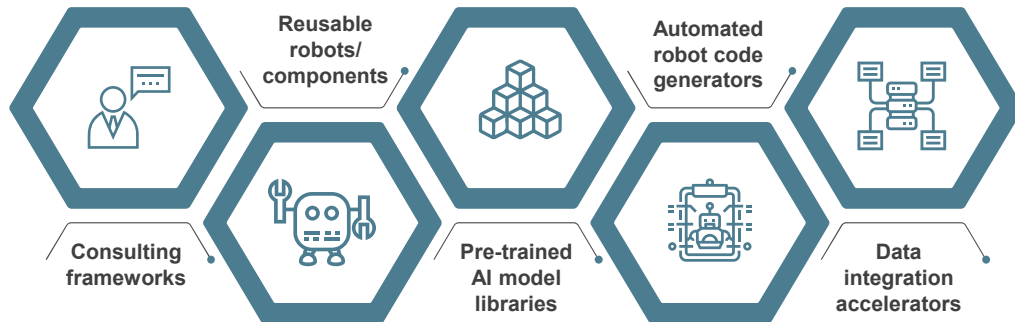

Solution characteristics

IPA FTE split by scope of automation
Percentage of total IPA FTEs

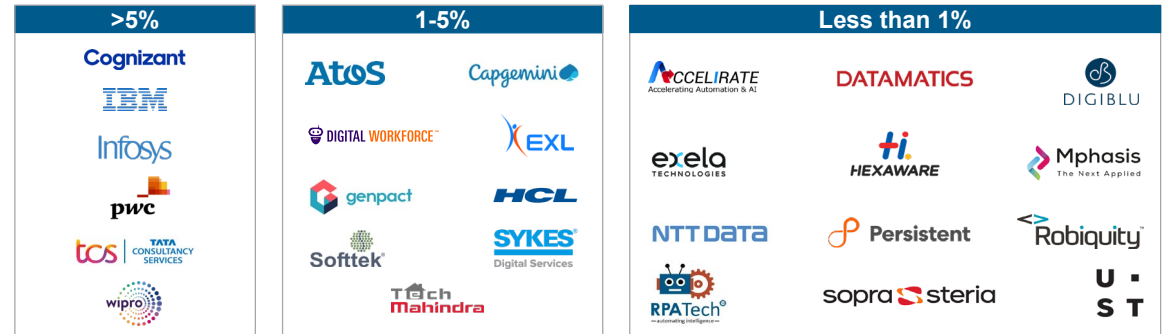

Services characteristics

Implementation accelerators offered by solution providers

IPA solution provider landscape

Solutions providers' IPA market share by revenue
(Listed in alphabetical order within each category)
