

# Enabling Data-based Process DNA Analysis – Process Mining State of the Market Report 2021

August 2021: Complimentary Abstract / Table of Contents

# Our research offerings

This report is included in the following research program(s):

## Service Optimization Technologies

- ▶ Application Services
- ▶ Banking & Financial Services BPS
- ▶ Banking & Financial Services ITS
- ▶ Catalyst™
- ▶ Clinical Development Technology
- ▶ Cloud & Infrastructure
- ▶ Conversational AI
- ▶ Contingent Workforce Management
- ▶ Cost Excellence
- ▶ Customer Experience Management Services
- ▶ Cybersecurity
- ▶ Data & Analytics
- ▶ Digital Adoption Platforms (DAP)
- ▶ Digital Services
- ▶ Engineering Services
- ▶ Enterprise Platform Services
- ▶ Finance & Accounting
- ▶ Financial Services Technology (FinTech)
- ▶ Global Business Services
- ▶ Healthcare BPS
- ▶ Healthcare ITS
- ▶ Human Resources
- ▶ Insurance BPS
- ▶ Insurance ITS
- ▶ Insurance Technology (InsurTech)
- ▶ Insurance Third-Party Administration (TPA) Services
- ▶ Intelligent Document Processing (IDP)
- ▶ Interactive Experience (IX) Services
- ▶ IT Services Executive Insights™
- ▶ Life Sciences BPS
- ▶ Life Sciences ITS
- ▶ Locations Insider™
- ▶ Market Vista™
- ▶ Mortgage Operations
- ▶ Multi-country Payroll
- ▶ Network Services & 5G
- ▶ Outsourcing Excellence
- ▶ Pricing-as-a-Service
- ▶ Process Mining
- ▶ Procurement
- ▶ Recruitment Process Outsourcing
- ▶ Rewards & Recognition
- ▶ Service Optimization Technologies
- ▶ Supply Chain Management (SCM) Services
- ▶ Talent Excellence GBS
- ▶ Talent Excellence ITS
- ▶ Technology Skills & Talent
- ▶ Trust and Safety
- ▶ Workplace Services
- ▶ Work at Home Agent (WAHA) Customer Experience Management (CXM)

## Background of the research

Everest Group defines Process Mining (PM) as a software product that involves a fact-based approach to help discover, monitor, and optimize as-is processes by analyzing process-related information from event logs generated by information systems (ERP, CRM, etc.) and/or recordings of activities performed by users on their desktops. Process mining has been one of the fastest growing markets in the intelligent automation space over the past few years. Process mining products find a wide variety of use cases from different business functions and verticals. Adoption of process mining solutions can not only help enterprises achieve cost savings and operational efficiency by identifying process optimization/automation opportunities, but also improve workforce productivity and enhance customer experience. These products are also rapidly evolving in the sophistication of their capabilities, features, and functionalities.

In this study, we investigate the state of the process mining market and focus on:

Introduction to process mining

Process mining market overview

Buyer insights

Process mining solution characteristics

Process mining product capabilities and trends

Process mining provider landscape

Task mining market overview

Outlook for 2021-22

## Overview and abbreviated summary of key messages (page 1 of 2)

This research provides process mining buyers, software providers, and third-party enablers (service providers and system integrators) a detailed view of the process mining market and analyzes it across dimensions, including market size and adoption trends (for both classic and desktop process mining), solution characteristics, product capabilities and trends, provider landscape, and outlook for 2021-22.

Some of the findings in this report, among others, are:

### Introduction to process mining

- Process mining solutions can be classified into three categories – classic process mining, desktop process mining / task mining, and hybrid process mining. This is driven by the nature of process data collected, scope of insights generated, and the associated use cases
- Process mining solutions help overcome the limitations of manual techniques and challenges in building a healthy transformation pipeline and offer a range of business, operational, and cost benefits to enterprises

### Process mining market overview

- The global process mining software market posted a 60-70% YoY growth and reached US\$320-340 million in 2020
- Continental Europe and North America continue to dominate the process mining market, with North America leading in terms of growth rate
- Manufacturing, BFSI, and healthcare industries are the leading adopters of process mining solutions, accounting for more than 50% of the market share

### Buyer insights

- Optimizing operations and enhancing customer experience are the key factors driving enterprise adoption of process mining solutions. Buyers are satisfied with their providers in helping achieve these drivers/objectives
- Many buyers acknowledge ease of product use as a key strength; however, they expect providers to improve advanced analytics capabilities

### Process mining solution characteristics

- Europe continues to be the major talent hub, given the origin of several providers from here. Other geographies are experiencing higher growth as providers look to expand global presence
- Greater flexibility to scale deployments and low upfront investments are driving the shift in adoption toward subscription-based licensing models

## Overview and abbreviated summary of key messages (page 2 of 2)

### Process mining product capabilities and trends

- Process mining technology continues to evolve with a host of new and native capabilities and enhancements to help enterprises achieve greater business value
- These latest developments in process mining solutions are expected to help enterprises expand the scope of process mining, derive quick actionable insights for process enhancement, enable continuous process monitoring, and accelerate automation initiatives

### Process mining provider landscape

- Celonis, Minit, Software AG, and UiPath are the top providers in terms of process mining software revenue. A few providers, such as Apromore, Monkey Mining, UiPath, and UpFlux, have achieved over 200% YoY growth
- Celonis has the largest client base, and Software AG holds the second spot in terms of number of process mining clients. Providers such as Apromore, MEHRWERK Process Mining, Monkey Mining, UiPath, and UpFlux doubled their client base YoY

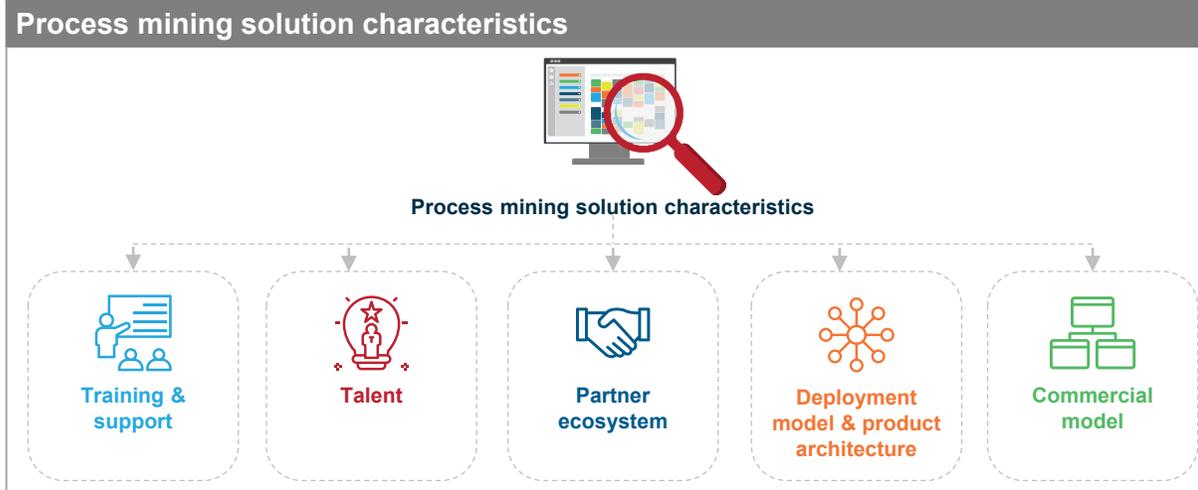

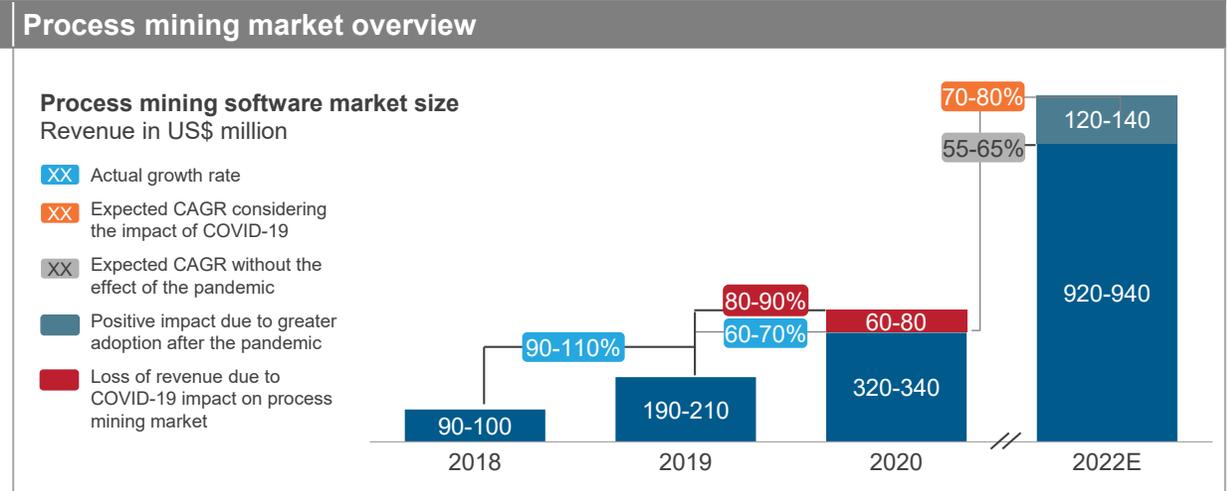

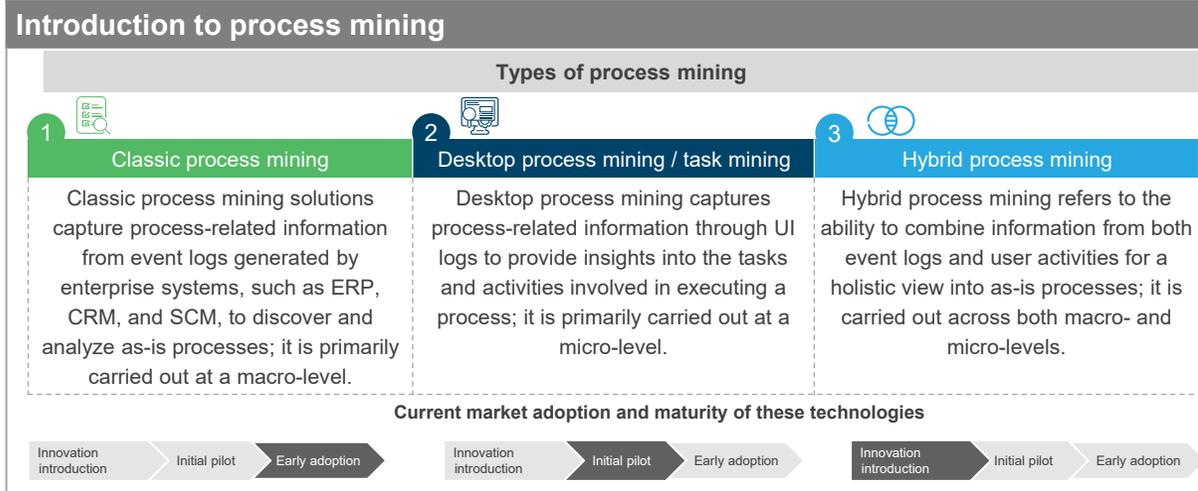

### Task mining market overview

- North America dominates task mining adoption globally; Continental Europe is observing significant growth with widespread adoption of task mining by early adopters of classic process mining solutions
- BFSI is the leading adopter of desktop process mining / task mining, followed by manufacturing and healthcare & pharma; professional services and manufacturing are experiencing the maximum growth rate

### Outlook for 2021-22

- Increasing need for enterprises to discover, monitor, and continuously optimize business processes and greater awareness about the role of process mining in driving digital transformation at scale, is expected to accelerate process mining adoption
- With the amplified demand for a holistic automation platform, strategic partnerships with providers of complementary solutions such as RPA and process orchestration are expected to increase

# This study offers eight distinct chapters providing a deep dive into key aspects of process mining market; below are four charts to illustrate the depth of the report
