## Background of the research

- Enterprises are adopting SAP S/4HANA to modernize their finance and accounting operations, enable end-to-end visibility across the supply chain, better forecast demand and sales, optimize inventory management, and streamline procurement operations
- However, enterprise expectations are evolving beyond the lift and shift of workloads and process reimagination to ecosystem orchestration using SAP S/4HANA to better orchestrate their enterprise application landscape to reap incremental value
- To address changing client expectations and accelerate the migration of its on-premise client base to the cloud, SAP is investing in augmenting its SAP product portfolio including SAP S/4HANA Cloud capabilities
- In this research, we present an assessment of 21 service providers featured on the SAP S/4HANA services PEAK Matrix®
- The assessment is based on Everest Group’s annual RFI process for calendar year 2020, interactions with leading services providers, client reference checks, and an ongoing analysis of the SAP S/4HANA services market

This report includes the profiles of the following 21 leading service providers featured on the SAP S/4HANA services PEAK Matrix:

- **Leaders:** Accenture, Deloitte, EY, IBM, Infosys, NTT DATA, and TCS
- **Major Contenders:** Atos, Capgemini, Cognizant, DXC Technology, HCL Technologies, LTI, PwC, Tech Mahindra, T-Systems, and Wipro
- **Aspirants:** Birlasoft, Mphasis, Stefanini, and UST

### Scope of this report:

**Geography**  
Global

**Service providers**  
21

**Services**  
SAP S/4HANA services

# Everest Group’s definition of scope of SAP S/4HANA services

NOT EXHAUSTIVE

Key functions

Advisory/consulting services

SAP S/4HANA platform strategy and roadmap formulation, mapping of existing technology landscape, product(s) selection, feasibility and readiness assessments, security assessment, integration strategy, governance, program management, change management, and CoE set-up advisory

Implementation services

Requirements gathering, technical and functional design, configuration design, workload migration, platform setup, customizations, application development and testing, integration, and deployment. Includes three types of implementation – greenfield, brownfield, and bluefield

Maintenance and support services

Helpdesk management, monitoring, incident management, issue resolution, emergency fixes, environment management, ongoing customizations and integrations, compliance and regulatory support, new feature addition, minor and major usability enhancements, and ongoing application reengineering

SAP S/4HANA

SAP S/4HANA on-premise

SAP S/4HANA Enterprise Management products, SAP S/4HANA LOB products, SAP S/4HANA LOB products for specific industries, and other compatibility packs; includes deployment on hyperscalers

SAP S/4HANA Cloud

Includes all the capabilities/functionalities of SAP S/4HANA private cloud and public cloud offerings, including multi-tenant and single-tenant versions

# The report includes detailed profiles and buyer case studies for 21 leading service providers

SAP S/4HANA Service Provider Compendium 2021

Service Provider | SAP S/4HANA services profile (page 2 of 5)

Overview

**Vision for SAP S/4HANA services:** Service Provider envisions resilient business platforms and digitalized core for SAP, accommodate dynamic market and industry needs. It aims to be the partner across manufacturing, public sector, and energy & utilities in North America and the Asia Pacific region.

**Partnership status with SAP:** Global Strategic Service Partner

**Number of projects completed in 2020:** 127

**Number of SAP S/4HANA experts:** 4,400

SAP S/4HANA Service Provider Compendium 2021

Service Provider | SAP S/4HANA services profile (page 5 of 5)

Case studies

Case study 1

Coca-Cola Hellenic

Business challenge

- Complex system environment delaying idea to market cycle
- High level of custom processes; limits scalability to innovate new business models
- Huge data volume – need to be leveraged for better insights
- Highly customized environment

Solution

- Digitalization of core processes and estimation of business benefits
- Identifying the right digital transformation roadmap
- World's largest (32 TB) conversion
- Implementing ML, MRP Live, new cash management, new asset management, condition contract management, etc.

Impact

- Integrated commercial and finance processes
- Easier SNP planning through Heuristics Implementation
- Increased visibility into product-specific demand, optimizing overall supply resources
- E2E process standards

Case study 2

European Parliament

Business challenge

The European Parliament was looking for a solution to modernize its existing financial systems that were reaching technical obsolescence. The client wanted to improve visibility and availability of decision-critical information for all levels of management and to improve control over available resources. The aim was to increase efficiencies by standardizing and automating key central financial processes, starting from budget execution to general accounting.

Solution

Service Provider implemented SAP S/4HANA – including capabilities such as Finance, Asset Management, Purchasing, and Embedded Analytics – to improve the financial system. It developed extensive workflow approval processes that were integrated in SAP Fiori and Fiori user interface. It also developed process orchestration & web services for multiple interfaces and used SAP GRC and SAP Solution Manager & test suite to further enhance financial processes.

Impact

- Improved the visibility and availability for all levels of management of decision-critical information, as well as the control over available resources (human, IT, and financial)
- Realized efficiencies by standardizing and automating key central financial processes starting from budget execution to general accounting
- Provided a solution to the approaching technical obsolescence of existing IT applications
