Background of the research

Background of the research

Vendor Management System (VMS) continues to be an important technology solution for enterprises across the globe. There is wide adoption across industries and geographies, as more enterprises are leveraging contingent workers as a part of their workforce and are highlighting the need for a technology solution to manage the entire contingent workforce management life cycle. In recent years, VMSs have not only enhanced the features and functionalities of core technology but have also expanded the scope of services delivered to other areas within Contingent Workforce Management (CWM). The increasing scope of services has led to an evolution in the vendor landscape, with many technology vendors building capabilities to cater to specialized client needs across geographies and industries.

The VMS technology landscape is evolving, with providers increasing the breadth and depth of their functionalities/offerings. They are investing to enhance the User Interface / User Experience (UI/UX) of the solution and providing a mobile-enabled solution for their clients. They are building additional capabilities to enhance compliance management, talent pool creation, and vendor and candidate sourcing. It is a burgeoning market, rapidly evolving in terms of product features, deployment options, product architecture, training & support, and a partner ecosystem.

In this study, we analyze the VMS technology landscape across various dimensions:

- Everest Group's PEAK Matrix® evaluation, a comparative assessment of 21 leading VMS technology vendors
- Competitive landscape in the VMS technology vendor market
- Remarks on key strengths and areas of improvement for each VMS technology vendor
- Assessment of VMS capabilities

Technology vendors
21 leading VMS technology vendors

Everest Group’s VMS research is based on multiple sources of proprietary information

Proprietary database of 21 VMS technology vendors

- The database tracks the following elements for each vendor:
 - Breadth and depth of the product functionalities
 - Core and emerging technology capabilities
 - Innovation and investments
 - Partnerships with service providers and other technology vendors
 - Deployment and hosting options
 - Product-related training and support services
 - Availability and adoption of commercial model(s)
 - Security and governance

Proprietary operational information database of technology vendors (updated annually)

- The database tracks the following operational information for each vendor:
 - Spend Under Management (SUM) and revenue
 - Number of clients
 - Number of FTEs and FTE split by geography
 - Portfolio coverage in terms of industry, geography, process areas, and buyer size

Demonstrations and interactions with technology vendors and other industry stakeholders

- Detailed demos for a comprehensive product view and executive-level discussions with VMS vendors that cover:
 - Current state of the market
 - Vision and strategy
 - Annual performance and outlook
 - Opportunities and challenges
 - Emerging areas of investment

Buyer reference interviews, ongoing buyer surveys, and interactions

- Interviews with technology vendors’ reference clients and enterprise VMS buyers to get the buyer perspective around:
 - Drivers and objectives for adopting VMS
 - Apprehensions and challenges
 - Assessment of vendors’ performance
 - Emerging priorities / buying criteria
 - Outcomes achieved
 - Lessons learned and best practices adopted

VMSs assessed¹

¹ In this study, we have assessed vendors’ offerings / product capabilities as of 2021

Note 1: Connecting-expertise was acquired by Pixid Group in December 2020; however, it continues to operate as a separate company / Worksuite was formerly called Shortlist (the company has undergone rebranding recently)

Note 2: The source of all content is Everest Group unless otherwise specified

Note 3: Workforce Logiq was acquired by PRO Unlimited in October 2021

Confidentiality: Everest Group takes its confidentiality pledge very seriously. Any contract-specific information collected will only be presented back to the industry in an aggregated fashion

The study provides detailed view of vendors' VMS offerings & capabilities as well as key strengths & areas of improvement | snapshots to illustrate the depth of report
