

Process Mining – Technology Provider Compendium 2022

July 2022: Complimentary Abstract / Table of Contents

Our research offerings

This report is included in the following research program(s):

Service Optimization Technologies, Process Mining

- ▶ Application Services
- ▶ Banking and Financial Services Business Process
- ▶ Banking and Financial Services Information Technology
- ▶ Catalyst™
- ▶ Clinical Development Technology
- ▶ Cloud and Infrastructure
- ▶ Contingent Staffing
- ▶ Contingent Workforce Management
- ▶ Conversational AI
- ▶ Customer Experience Management Services
- ▶ CX Excellence
- ▶ Cybersecurity
- ▶ Data and Analytics
- ▶ Digital Adoption Platforms (DAP)
- ▶ Digital Engineering Services
- ▶ Digital Services
- ▶ Digital Workplace
- ▶ Employee Experience Management (EXM) Platforms
- ▶ Engineering Services
- ▶ Enterprise Platform Services
- ▶ Finance and Accounting
- ▶ Financial Services Technology (FinTech)
- ▶ Global Business Services
- ▶ Healthcare Business Process
- ▶ Healthcare Information Technology
- ▶ Human Resources Outsourcing
- ▶ Insurance Business Process
- ▶ Insurance Information Technology
- ▶ Insurance Technology (InsurTech)
- ▶ Insurance Third-Party Administration (TPA) Services
- ▶ Intelligent Document Processing (IDP)
- ▶ Interactive Experience (IX) Services
- ▶ IT Services Executive Insights™
- ▶ Life Sciences Business Process
- ▶ Life Sciences Commercial Technologies
- ▶ Life Sciences Information Technology
- ▶ Locations Insider™
- ▶ Marketing Services
- ▶ Market Vista™
- ▶ Mortgage Operations
- ▶ Multi-country Payroll
- ▶ Network Services and 5G
- ▶ Outsourcing Excellence
- ▶ Pricing-as-a-Service
- ▶ Process Mining
- ▶ Procurement
- ▶ Recruitment
- ▶ Retirement Technologies
- ▶ Rewards and Recognition
- ▶ Service Optimization Technologies
- ▶ Software Product Engineering Services
- ▶ Supply Chain Management (SCM) Services
- ▶ Sustainability Technology and Services
- ▶ Talent Excellence GBS
- ▶ Talent Excellence ITS
- ▶ Technology Skills and Talent
- ▶ Trust and Safety
- ▶ Work at Home Agent (WAHA) Customer Experience Management (CXM)

Our research methodology is based on four pillars of strength to produce actionable and insightful research for the industry

01

Robust definitions and frameworks

Function specific pyramid, Total Value Equation (TVE), PEAK Matrix®, and market maturity

02

Primary sources of information

Annual RFIs, provider briefings and buyer interviews, web-based surveys

03

Diverse set of market touchpoints

Ongoing interactions across key stakeholders, input from a mix of perspectives and interests, supports both data analysis and thought leadership

04

Fact-based research

Data-driven analysis with expert perspectives, trend-analysis across market adoption, contracting, and providers

Proprietary database on process mining capabilities of 19+ technology providers

Year-round tracking of 19+ process mining providers

Large repository of existing research in process mining

Executive-level relationships with buyers, providers, technology providers, and industry associations

Background of the research

Background of the research

Everest Group defines process mining as a type of analytics product that involves a fact-based approach to help discover, monitor, and optimize as-is processes by analyzing process-related information primarily from event logs generated by enterprise systems (ERP, CRM, etc.). The technology provides a data-based approach to process optimization through numerous applications and use cases spanning industries and process areas. This has led to process mining being and continuing to be one of the fastest-growing markets in the Intelligent Automation (IA) space. The adoption of process mining not only helps enterprises achieve traditional benefits such as cost savings and operational efficiency, it also opens avenues to target business/strategic outcomes such as top-line growth, accelerated digital transformation, enhanced customer experience, and sustainability. In order to support the enterprise objectives, products are rapidly evolving in the sophistication of their capabilities, features, and functionalities.

In this study, we assess process mining software products in the market that can analyze process-related information captured in event logs to discover process maps that are available independent of professional services. The objective of this report is to provide key stakeholders with a snapshot of the process mining offerings and capabilities of technology providers. In this report, we feature detailed profiles of 19 leading process mining technology providers to assist process mining buyers in selecting providers that can best serve their needs. It also allows technology providers to compare their offerings, capabilities, strengths, and limitations with other providers in the marketplace.

Each technology provider profile covers the following details of providers vis-à-vis their process mining offerings and capabilities:

- Company overview
- Recent deals & announcements
- Market adoption & client portfolio mix
- Product overview & partnerships
- Product features & functionalities and key enhancements
- Measure of capabilities across PEAK Matrix® dimensions
- Key strengths & limitations for technology providers

technology providers

Product
Process mining

Types of process intelligence solutions

Process intelligence solutions can either include or be grouped into two categories, depending on the nature of data leveraged and the scope of insights generated

Types of process intelligence

Process mining

Process mining solutions capture process-related information from event logs generated by enterprise systems, such as ERP, CRM, and Supply Chain Management (SCM), to discover and analyze as-is processes; process mining is primarily carried out at a macro level.

Task mining

Task mining captures process-related information through UI activities¹ to provide insights into the tasks and activities involved in executing a process; it is primarily carried out at a micro level.

Focus of this research

Current market adoption and maturity of these technologies

¹ User actions and metadata, such as keystrokes, mouse clicks, activity screenshots, and application object IDs, are captured/recorded across desktops to create UI logs
Note: In this research, task mining is considered as a complementary capability for process mining solutions.

This report is based on multiple key sources of proprietary information

Proprietary database of 19 process mining technology providers

- The database tracks the following elements of each provider:
 - Process setup, data preparation, and integration
 - Process discovery, conformance, and monitoring features
 - Deployment and hosting options
 - Partnerships with service providers and other technology providers
 - Product-related training and support services
 - Availability and adoption of commercial model(s)
 - IT governance and security

Proprietary operational information database of technology providers (updated annually)

- The database tracks the following for each provider:
 - Revenue and number of FTEs
 - Number of clients
 - FTE split by different lines of business
 - Portfolio coverage in terms of industry, geography, process areas, and buyer size

Demonstrations and interactions with technology providers and other industry stakeholders

- Detailed demos for a comprehensive product view and executive-level discussions with process mining providers that cover:
 - Current state of the market
 - Vision and strategy
 - Annual performance and future outlook
 - Opportunities and challenges
 - Emerging areas of investment

Buyer reference interviews, ongoing buyer surveys, and interactions

- Interviews with technology providers' reference clients and enterprise process mining buyers to get the buyer perspective around:
 - Drivers and objectives for adopting process mining
 - Apprehensions and challenges
 - Assessment of providers' performance
 - Emerging priorities / buying criteria
 - Outcomes achieved
 - Lessons learnt and best practices adopted

¹ In this study, we have assessed providers' offerings / product capabilities as of December 2021. Analyses for Everflow, Logpickr, and Minit are based on their capabilities before their acquisition by Pegasystems, iGrafx, and Microsoft, respectively.

The source of all content is Everest Group unless otherwise specified.

Confidentiality: Everest Group takes its confidentiality pledge very seriously. Any information we collect that is contract specific will only be presented back to the industry in an aggregated fashion.

This study provides detailed view of providers' process mining offerings & capabilities as well as key strengths and limitations; below are four charts to illustrate the depth of the report

Assessment of capability and market impact

Measure of capability: ● Low ● High

Providers	Market impact				Vision & capability					
	Market adoption	Portfolio mix	Value delivered	Overall	Vision and strategy	Process setup and integration	Process intelligence	Implementation and support	Commercial and sales model	Overall
Provider 1	●	●	●	●	●	●	●	●	●	●
Provider 2	●	●	●	●	●	●	●	●	●	●
Provider 3	●	●	●	●	●	●	●	●	●	●
Provider 4	●	●	●	●	●	●	●	●	●	●
Provider 5	●	●	●	●	●	●	●	●	●	●
Provider 6	●	●	●	●	●	●	●	●	●	●
Provider 7	●	●	●	●	●	●	●	●	●	●
Provider 8	●	●	●	●	●	●	●	●	●	●

Technology provider's overview

Company overview
 XXX aims to enable its customers improve operational efficiency and agility by helping them analyze, monitor, and model business operations. Its offering includes xxx for process mining, xxx Metrics for performance management, designer for business process analysis, and architect for business design. The company holds several patents in the US for its process mining technology.

Split of process mining revenue by buyer industry

Split of process mining revenue by process areas

Split of process mining revenue by buyer geography

Split of process mining revenue by offerings

Product features and functionalities

Legend: ■ Available ■ In the roadmap ■ Available via partner ■ Not available

Category	Feature/Functionality	Availability
Process setup and data preparation	Built-in ability to pre-process (prepare, clean, and transform) event logs data	Available
	Ability to supplement event logs with data from IoT devices for discovering processes	Available
Interoperability	Pre-built connectors for SAP applications	Available
	Pre-built connectors for Oracle applications	Available
	Pre-built connectors for Microsoft applications	Available
	Pre-built connectors for ServiceNow applications	Available
Integration with complementary capabilities	Task mining	Available
	Process orchestration	Available via partner
Process discovery	Ability to create Business Process Modeling Notation (BPMN) 2.0 compliant process models	Available
	Ability to detect exceptions (failed transactions) in process	Available
	Ability to display all discovered process variants side-by-side	Available
	Ability to detect anomalies / fraudulent transactions in a process	Available

Everest Group's remarks on technology providers

Measure of capability: ● Low ● High

Market impact				Vision & capability					
Market adoption	Portfolio mix	Value delivered	Overall	Vision and strategy	Process setup and integration	Process intelligence	Implementation and support	Commercial and sales model	Overall
●	●	●	●	●	●	●	●	●	●

Strengths

- Provider 1 has a vision to help enterprises become more agile and efficient in their operations by providing software solutions for process modeling, performance management, and process mining
- It leverages AI-based clustering to offer key process discovery features such as variant analysis to identify optimal process variant, anomaly detection, decision rule extraction, multi-level process mining, and organization-level relationship mining

Limitations

- The majority of provider 1's clientele is from Continental Europe, and its presence in other key geographies such as North America and APAC is relatively low
- Its client portfolio is skewed toward midsize and large enterprise segments with revenue greater than US\$1 billion. It has relatively lower experience of serving enterprises in the SMB segment

Everest Group is a research firm focused on strategic IT, business services, engineering services, and sourcing. Our research also covers the technologies that power those processes and functions and the related talent trends and strategies. Our clients include leading global companies, service and technology providers, and investors. Clients use our services to guide their journeys to maximize operational and financial performance, transform experiences, and realize high-impact business outcomes. Details and in-depth content are available at www.everestgrp.com.
