

# Digital Product Engineering Services PEAK Matrix® Assessment 2022: Bridging the Chasm between the Physical and Digital Worlds

March 2022: Complimentary Abstract / Table of Contents

# Our research offerings

This report is included in the following research program(s):

[Engineering Services](#), [Digital Engineering Services](#)

- ▶ Application Services
- ▶ Banking and Financial Services Business Process
- ▶ Banking and Financial Services Information Technology
- ▶ Catalyst™
- ▶ Clinical Development Technology
- ▶ Cloud and Infrastructure
- ▶ Contingent Staffing
- ▶ Contingent Workforce Management
- ▶ Conversational AI
- ▶ Customer Experience Management Services
- ▶ Cybersecurity
- ▶ Data and Analytics
- ▶ Digital Adoption Platforms (DAP)
- ▶ Digital Engineering Services
- ▶ Digital Services
- ▶ Digital Workplace
- ▶ Engineering Services
- ▶ Enterprise Platform Services
- ▶ Finance and Accounting
- ▶ Financial Services Technology (FinTech)
- ▶ Global Business Services
- ▶ Healthcare Business Process
- ▶ Healthcare Information Technology
- ▶ Human Resources Outsourcing
- ▶ Insurance Business Process
- ▶ Insurance Information Technology
- ▶ Insurance Technology (InsurTech)
- ▶ Insurance Third-Party Administration (TPA) Services
- ▶ Intelligent Document Processing (IDP)
- ▶ Interactive Experience (IX) Services
- ▶ IT Services Executive Insights™
- ▶ Life Sciences Business Process
- ▶ Life Sciences Information Technology
- ▶ Locations Insider™
- ▶ Marketing Services
- ▶ Market Vista™
- ▶ Mortgage Operations
- ▶ Multi-country Payroll
- ▶ Network Services and 5G
- ▶ Outsourcing Excellence
- ▶ Pricing-as-a-Service
- ▶ Process Mining
- ▶ Procurement
- ▶ Recruitment
- ▶ Retirements Technologies
- ▶ Rewards and Recognition
- ▶ Service Optimization Technologies
- ▶ Software Product Engineering Services
- ▶ Supply Chain Management (SCM) Services
- ▶ Sustainability Technology and Services
- ▶ Talent Excellence GBS
- ▶ Talent Excellence ITS
- ▶ Technology Skills and Talent
- ▶ Trust and Safety
- ▶ Work at Home Agent (WAHA) Customer Experience Management (CXM)

## Background and introduction of the research

The recent advances in technology have led to a massive digital wave in the engineering world, wherein physical products are being enhanced by making them smarter, connected, autonomous, and intelligent. To cater to the evolving customer needs and provide a rich customer experience, enterprises are making significant investments in the next-generation technologies such as AI/ML, AR/VR, 5G, blockchain, IoT, and cybersecurity, which serve as the backbone of digital products. However, the rapid pace of innovation and the need to stay ahead of market trends in this current space necessitates the need to establish a compelling partnership ecosystem that can help enterprises accelerate time-to-market. To cater to this growing demand from enterprises, engineering service providers are actively enhancing their capabilities and offerings to unlock the potential of data from connected products, integrate multiple technologies for better user experience, and ultimately engineer technologically sound digital products.

This research is the first edition of Everest Group's **Digital Product Engineering Services PEAK Matrix® Assessment**, wherein we have presented an assessment of 30 engineering service providers featured on the PEAK Matrix, along with the sourcing considerations for enterprises. This assessment is based on the RFI responses from service providers, interactions with their digital product engineering leadership, client reference checks, and ongoing analysis of the engineering services market.

**This report includes the profiles of the following 30 leading engineering service providers featured on the Digital Product Engineering PEAK Matrix:**

- **Leaders:** Accenture, Capgemini, Cognizant, HCL Technologies, Infosys, LTTS, TCS, and Wipro
- **Major Contenders:** Bosch Global Software Technologies (BGSW), Cyient, eInfochips, Experion Technologies, GlobalLogic, GS Lab, Happiest Minds, HARMAN DTS, Infinite Computer Solutions, Innominds, Itransition, Mindtree, Mphasis, Sasken, SoftServe, Tech Mahindra, and VVDN Technologies
- **Aspirants:** Accolite Digital, Aspire Systems, Daffodil Software, e-Zest, and Sonata Software

### Scope of this report

**Geography**  
Global

**Providers**  
30 leading engineering service providers

**Services**  
Digital product engineering services

## Overview and abbreviated summary of key messages

This report examines the global digital product engineering services landscape. It assesses 30 leading engineering service providers, evaluating their capabilities and market impact to help enterprises develop smart, connected, autonomous, and intelligent products in order to deliver superior customer experiences.

Some of the findings in this report, among others, are:

### Service provider position and delivery capability

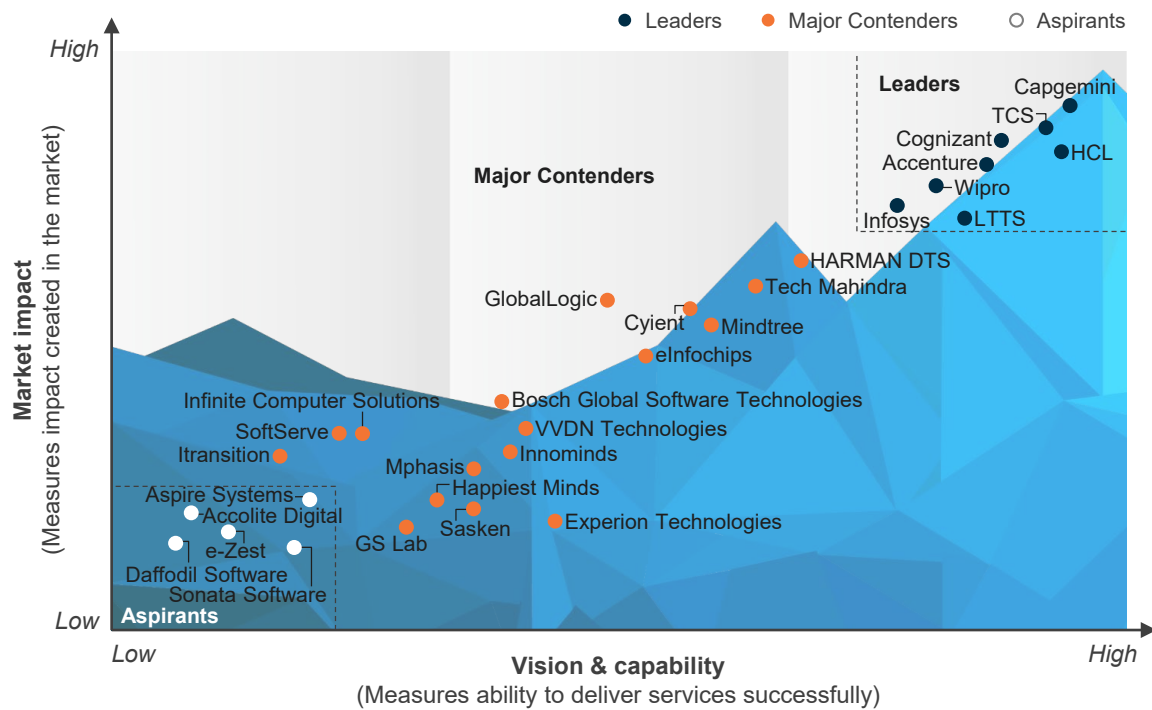

- Service providers can be categorized into leaders, major contenders, and aspirants on a capability-market-share matrix for digital product engineering services
- Accenture, Capgemini, Cognizant, HCL Technologies, Infosys, LTTS, TCS, and Wipro are the current leaders in the global digital product engineering services market. However, several service providers are emerging as major contenders

### Service provider characteristics

- The Leaders segment comprises both pure-play as well as broad-based IT-heritage firms that have developed dominant capabilities in offering multidisciplinary digital product engineering capabilities
- Leaders have been able to successfully grow organically by forming partnerships with hardware, embedded, and software vendors and making investments in developing labs, CoEs, and innovation centers in next-generation technologies such as AR/VR, IoT, analytics, AI/ML, 5G, semiconductor engineering, and ASIC design
- Major Contenders also comprise both IT-heritage firms as well as pure-play engineering service providers, who are actively making investments in establishing labs and CoEs and developing IPs and solutions in areas such as AI/ML, testing, analytics, IoT, cybersecurity, and embedded systems
- Aspirants offer capabilities mostly across the software engineering part of the value chain and have a limited portfolio of services required to develop hardware and embedded products. They are actively training and upskilling their engineering talent, their investments in labs, CoEs, partnerships, and IPs are limited

# This study offers three distinct chapters providing a deep dive into key aspects of digital product engineering services market; below are three charts to illustrate the depth of the report

Digital Product Engineering Services PEAK Matrix® Assessment 2022<sup>1,2,3</sup>

Capability assessment

Everest Group's remarks on providers

Illustrative example

Measure of capability: ☐ Low ● High

Market impact				Vision & capability				
Market adoption	Portfolio mix	Value delivered	Overall	Vision and strategy	Scope of services offered	Innovation and investments	Delivery footprint	Overall
☐	☐	●	☐	●	☐	☐	☐	☐

**Strengths**

- Significant investments in establishing labs, CoEs, and innovation centers in areas such as AI/ML, AR/VR, cybersecurity, 5G, IoT, and embedded systems
- Has a well-balanced portfolio of customers spanning key geographies and industry verticals

**Limitations**

- Lacks experience in serving clients with emerging commercial constructs such as risk-reward, revenue-sharing, and outcome-based models
- Offshore-heavy delivery model with limited presence in nearshore and onshore geographies

1 Assessments for SoftServe and Tech Mahindra exclude service provider inputs and are based on Everest Group's proprietary Transaction Intelligence (TI) database, service provider public disclosures, and Everest Group's interaction with buyers.  
 2 Assessment of Capgemini is inclusive of Altran (part of Capgemini) and reflects their joint capabilities and market impact.  
 3 While GlobalLogic was acquired by Hitachi in July 2021, the assessment has been conducted on the basis of GlobalLogic as a stand-alone entity only.

Everest Group is a research firm focused on strategic IT, business services, engineering services, and sourcing. Our research also covers the technologies that power those processes and functions and the related talent trends and strategies. Our clients include leading global companies, service and technology providers, and investors. Clients use our services to guide their journeys to maximize operational and financial performance, transform experiences, and realize high-impact business outcomes. Details and in-depth content are available at [www.everestgrp.com](http://www.everestgrp.com).
