Background of the research

Data and analytics is increasingly playing a critical role in healthcare enterprises' growth strategies, given the increasing importance of data-driven decision-making in the healthcare industry. While in the past, the focus of data and analytics services was primarily on only reducing costs and optimizing operations, it has given way to a renewed emphasis on enhancing health outcomes and customer experience. The healthcare industry is currently experiencing a significant increase in investments in advanced analytics and data integration to enable the implementation of use cases in key areas such as value-based care, population health, interoperability, and data privacy. Even though payers are still ahead of providers when it comes to data and analytics adoption, providers are quickly catching up, the trend has partly been accelerated by the pandemic. Service providers can help to assist healthcare enterprises in defining their data and analytics strategy and roadmap, upgrading their infrastructure, extracting valuable insights, and offering relevant recommendations for enterprise-level decision-making that ultimately delivers tangible business benefits.

In this research, we present an assessment and detailed profiles of 35 service providers featured on the **Healthcare Data and Analytics Services PEAK Matrix®**. Each provider profile provides a comprehensive picture of its service focus, key Intellectual Property (IP) / solutions, domain investments, and case studies. The assessment is based on Everest Group's annual RFI process for the calendar year 2023, interactions with leading service providers, client reference checks, and ongoing analysis of the healthcare data and analytics services market.

This report includes the profiles of the following 35 leading service providers featured on the Healthcare Data and Analytics Services PEAK Matrix®:

- **Leaders:** Accenture, Cognizant, Deloitte, EXL, HCLTech, NTT DATA, Optum, and TCS
- **Major Contenders:** Atos, CitiusTech, Concentrix, DXC Technology, Emids, EPAM, EY, Fractal Analytics, Genpact, HARMAN DTS, IBM, Infinite Computer Solutions, Infosys, Innova Solutions, LTIMindtree, Persistent Systems, PwC, SoftServe, Tech Mahindra, Virtusa, and Wipro
- **Aspirants:** Apexon, Capgemini, GAVS, Marlabs, Mastek, and Smart Data Solutions

Geography
Global

Providers
Healthcare (payer and provider)

Services
Data & analytics services

Overview and abbreviated summary of key messages

This report examines the global healthcare data and analytics services provider landscape and its impact on the healthcare market. It focuses on provider position and growth in the healthcare market, changing market dynamics and emerging provider trends, and assessment of provider delivery capabilities. It also identifies the key implications of the research findings for buyers and service providers.

Some of the findings in this report, among others, are:

Healthcare data and analytics services market

- There has been an upward trend in investments toward data and analytics, which can be attributed to the fact that it has emerged as a fundamental pillar of enterprises' growth strategies – the overall data and analytics services market is close to US\$7 Billion and is expected to grow at a CAGR of ~20% between 2022 and 2025
- Payers are currently leading the race when it comes to data and analytics adoption, but providers are quickly catching up. Currently, payer spending in the healthcare data and analytics market is twice as much as provider spending

Emerging healthcare data and analytics services trends

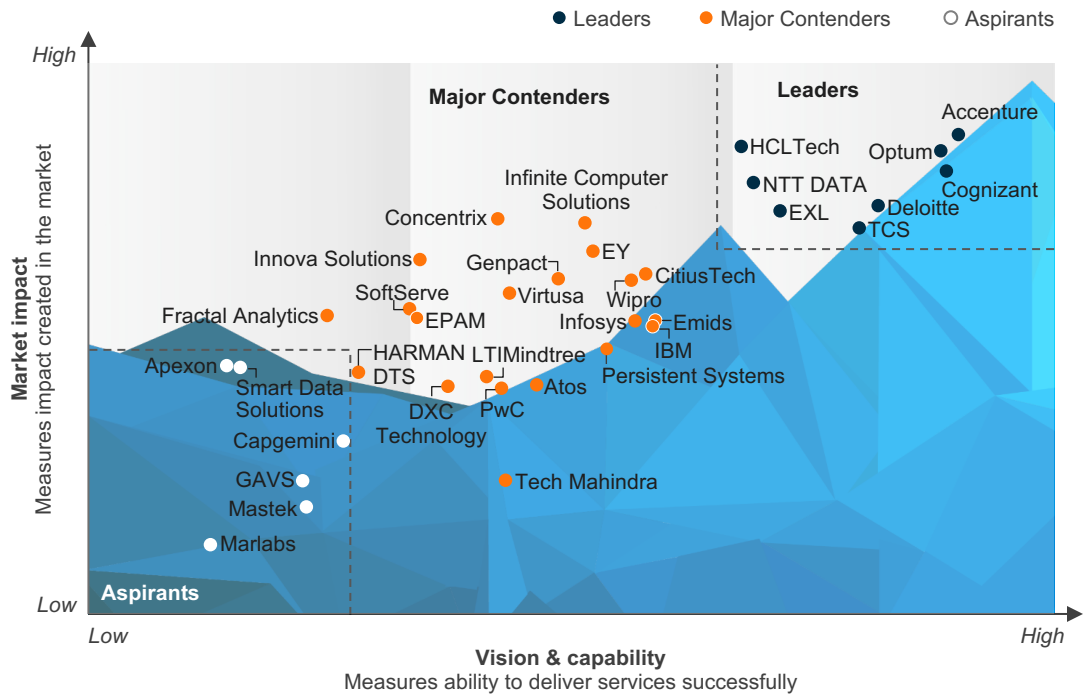

- There has been a paradigm shift in the way healthcare enterprises think about the need for data and analytics in healthcare. While the conventional focus was solely on cost optimization and improving operational efficiency, enterprises are currently focusing on improving health outcomes and customer experience
- While there has been a significant uptick in investments across all segments of healthcare data and analytics, enterprise data management and advanced analytics are leading the pack

Healthcare data and analytics service provider delivery capability

- With enterprises focus turning to value-based care, customer satisfaction and data privacy, service providers are aiming to double down on these areas to build brand recall and market presence
- Many service providers are investing heavily in augmenting their capabilities through significant investments in mergers and acquisitions, industry partnerships, collaborations, and talent investments, to name a few

This study offers four distinct chapters providing a deep dive into key aspects of healthcare data and analytics services market; below are three charts to illustrate the depth of the report

Healthcare Data and Analytics Services PEAK Matrix® Assessment 2023¹

1 Assessments for Atos, Capgemini, Deloitte, DXC Technology, EY, IBM, Infosys, PwC, Tech Mahindra, and Wipro exclude provider inputs and are based on Everest Group's proprietary Transaction Intelligence (TI) database, provider public disclosures, and Everest Group's interactions with healthcare buyers

Provider 8	🟡	🟡	🟡	🟡	●	🟡	●	🟡	🟡

Everest Group's remarks on providers

Illustrative example

Measure of capability: 🟡 Low ● High

Market impact				Vision & capability				
Market adoption	Portfolio mix	Value delivered	Overall	Vision and strategy	Scope of services	Innovation & investments	Delivery footprint	Overall
🟡	🟡	🟡	🟡	●	🟡	●	🟡	🟡

Strengths

- Provider 1 strong consulting capabilities, coupled with its healthcare domain expertise, enable it to provide strategic support and industry insights in its healthcare data and analytics engagements
- Provider 1 has authored multiple thought leadership papers in emerging technology areas (along with healthcare-specific perspectives) such as health equity, behavioral health, price transparency, population health, AI, virtual care, and health-tech

Limitations

- Most of Provider 1 client base are large buyers. It should try to expand into the small and midsize buyer segments
- Provider 1 is perceived as being on the premium side. It should look to improve its cost-competitiveness to be able to cater to a wider spectrum of clients
