Introduction

In an era where enterprises have acknowledged that hybrid and remote work will continue to persist for many years, a superior workplace Employee Experience (EX) is crucial to ensure higher productivity, engagement, and satisfaction. This necessitates a constant need to measure holistic EX including both transactional data such as user, endpoint, and application data as well as elusive employee factors, such as employee sentiment, connectedness, and employee engagement. Both have a significant influence on the overall experience. The cornerstone of successful WEEM lies in enterprises' ability to first define EX and then continually measuring the EX to identify limitations to make necessary course corrections.

Enterprises globally are continuously seeking capabilities that will help them in monitoring and management of the overall workplace EX and help resolve any disruptive issues. WEEM providers are also evolving rapidly and upgrading their platform capabilities in terms of EX focus, platform features, interoperability, partner ecosystem, training and support, and commercial models to meet enterprise expectations and global traction in this domain.

In this research, we present an assessment and detailed profiles of 10 WEEM platform providers featured on the WEEM platforms PEAK Matrix®.

This report includes the profiles of the following 10 leading WEEM platform providers featured on the WEEM platforms PEAK Matrix:

- **Leaders:** Lakeside SysTrack, Nexthink, Riverbed Aternity, and Whatfix
- **Major Contenders:** 1E, Citrix Analytics, ControlUp, and Qualtrics XM
- **Aspirants:** eG Innovations and uberAgent

Strengths

- Provider 1 has an EX-centric vision, innovation focus, cloud-native capabilities, and inter-operability with key enterprise applications, which is resonating well with enterprises
- It provides customizability by enabling users to create Tableau-based custom dashboards, which resonates well with enterprise preferences

Limitations

- Provider 1 needs to be more cognizant of its customers' requirements while planning its product roadmap or launching new features in the platform
- Its clientele is skewed toward the BFSI and manufacturing industries; enterprises belonging to other verticals should do further due diligence on its capabilities and market impact in their respective verticals
