# Background of the research

Over the past few years, the public cloud market has seen significant growth, driven by enterprise demand for business transformation, innovation, and resilience. Amazon Web Services (AWS) has also accelerated its adoption globally through investments in generative AI, industry cloud solutions, data analytics, and security.

As AWS continues to evolve, enterprises increasingly seek AWS service providers to facilitate seamless cloud transitions. These providers offer essential expertise in transforming and managing AWS environments, particularly in terms of controlling costs, providing technically adept resources, and harnessing innovative technologies to deliver business value. Being well-connected with AWS also enables them to provide tailored solutions that meet industry-specific needs, enhance operational efficiency, and drive innovation.

Through targeted efforts, AWS Service Providers (SPs) are evolving their joint GTM activities, increasing their accreditations and competencies, and building AWS-specific IPs and solutions, resulting in continued prominence in the market.

In this research, we present an assessment and detailed profiles of 31 AWS SPs featured on AWS Services PEAK Matrix® Assessment 2024. The assessment is based on Everest Group's annual Request for Information (RFI) process for the calendar year 2024, interactions with leading AWS SPs, client reference checks, and an ongoing analysis of the cloud services market.
