Introduction

In the contemporary business landscape, sustainability has transcended its erstwhile status as a mere buzzword and has emerged as a critical imperative for enterprises across industries. Amidst growing concerns about climate change, resource depletion, and social inequalities, businesses are under mounting pressure to not only mitigate their environmental impact but also to proactively contribute to societal well-being. In this context, sustainability enablement technology and services have assumed paramount importance, offering instrumental solutions to navigate the complexities of sustainability challenges.

However, the dearth of tangible market proof points as the standards and best practices continue to evolve, compounds the challenge of decision-making. Enterprises find themselves grappling with the daunting task of navigating this complex landscape to select partners who can not only address their immediate sustainability needs but also align with their long-term strategic objectives.

In this research, we present an assessment and detailed profiles of 24 sustainability enablement technology and services providers featured on the Sustainability Enablement Technology Services PEAK Matrix®. Each provider profile provides a comprehensive picture of its service focus, key Intellectual Property (IP) / solutions, domain investments, and case studies. The assessment is based on Everest Group's annual RFI process for the calendar year 2024, interactions with leading sustainability enablement technology and service providers, client reference checks, and an ongoing analysis of the sustainability services market.

This report includes the profiles of the following 24 leading service providers featured on the Sustainability Enablement Technology Services PEAK® Matrix:

- **Leaders**: Accenture, Capgemini, Deloitte, EY, NTT DATA, PwC, and TCS
- **Major Contenders**: Atos, Cognizant, DXC Technology, Gramener – A Straive company, HCLTech, Hitachi Digital Services, Infosys, KPMG, Kyndryl, LTIMindtree, Tech Mahindra, UST, and Wipro
- **Aspirants**: GEP, GFT, SG Analytics, and Stefanini

Scope of this report

Geography: Global

Industry: Cross-industry

Services: Sustainability enablement technology services

Overview and abbreviated summary of key messages

This report examines the sustainability enablement technology services market and evaluates the positioning of service providers on the Everest Group PEAK Matrix ®. It provides insights into evolving market dynamics, competitive landscape, providers' capabilities, and Everest Group's remarks on providers' key strengths and limitations.

Some of the findings in this report, among others, are:

Low-hanging fruits in the sustainability enablement technology services landscape
Majority of the sustainability enablement engagements are focused on ESG data management, net zero services, and responsible supply chain.

Capability enhancement by service providers
Service providers have invested in augmenting their sustainability enablement capabilities via several channels including joint go-to-markets, inhouse tools, and dedicated CoEs to enhance credibility in the market.
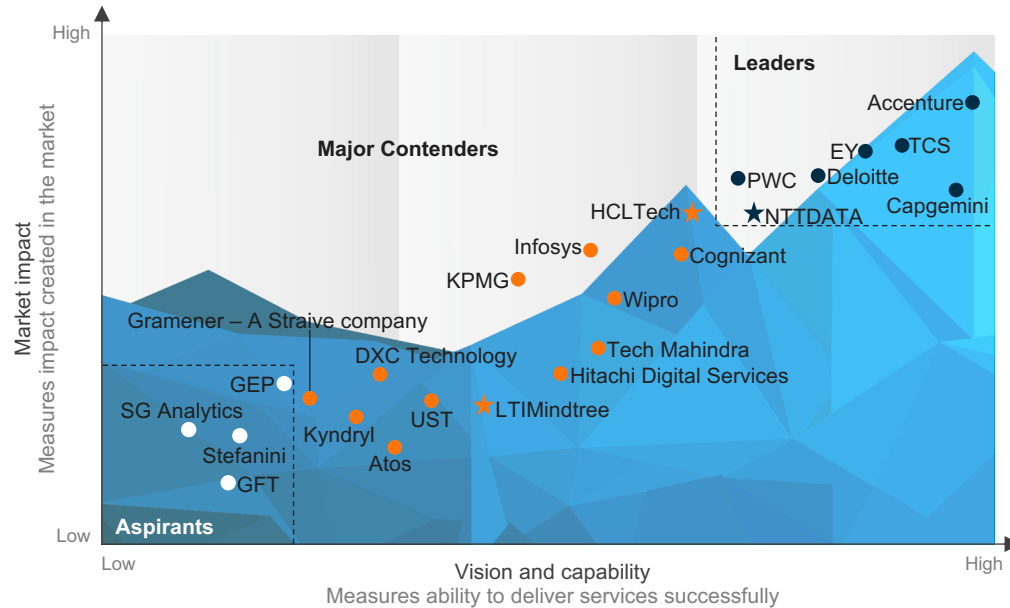

Buyers' perception
Buyers perceive gaps in the service provider capabilities with regards to change management, commercial flexibility, and domain knowledge, and expect higher levels of value addition from providers.

This study offers five distinct chapters providing a deep dive into key aspects of sustainability enablement technology services market; below are three charts to illustrate the depth of the report

Everest Group PEAK Matrix® Assessment 2024

Sustainability Enablement Technology Services PEAK Matrix® Assessment 2024[1,2,3]

- ● Leaders ● Major Contenders ○ Aspirants ☆ Star Performers

Market impact
Measures impact created in the market

High / Low

Leaders
- Accenture
- EY
- TCS
- PWC
- Deloitte
- NTTDATA
- Capgemini

Major Contenders
- HCLTech
- Infosys
- Cognizant
- KPMG
- Wipro
- Tech Mahindra
- Hitachi Digital Services
- Gramener – A Straive company
- DXC Technology
- LTIMindtree
- UST

Aspirants
- GEP
- SG Analytics

- Stefanini
- Atos
- GFT

Vision and capability
Measures ability to deliver services successfully

Low / High

1 Assessment for Deloitte, Infosys, and KPMG excludes provider inputs and is based on Everest Group's proprietary Transaction Intelligence (TI) database, provider public disclosures, and Everest Group's interactions with buyers
2 Assessment for Accenture, Atos, DXC technology, EY, and PwC includes partial inputs from the service providers and is based on Everest Group's estimates that leverage Everest Group's proprietary data assets, service providers' public disclosures, and interaction with buyers
3 This assessment takes into account the recent divestment of EcoAct by Atos and its impact on the latter's ability to provide sustainability enablement technology services

Everest Group's remarks on providers

Illustrative example

Measure of capability: ◔ Low ● High

Market impact				Vision and capability				
Market adoption	Portfolio mix	Value delivered	Overall	Vision and strategy	Scope of services offered	Innovation and investments	Delivery footprint	Overall
◔	◑	◑	●	◑	◑	◑	◑	●

Strengths
- Provider 1 has a focus on enabling environmental stewardship with a comprehensive set of offerings for net zero transitions, sustainable value chain, ESG data management, and green IT
- It has invested in a robust go-to-market approach for separate geographies such as EMEA and North America, and has a good understanding of the geography-wise nuances

Limitations
- While Provider 1 has a strong presence in planet-led services, it has a lesser focus on and lacks depth and scale of IPs in people-led services
- Most of Provider 1's experience comes from larger value deals with large enterprises. It has limited coverage for mid- and small-sized buyers
